

# Save search queries and setup alerts

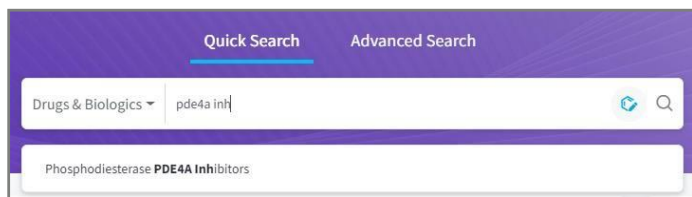

## Cortellis Drug Discovery Intelligence

**Want to be up to date in your research area? Do not want to miss new competitor compounds?**

Cortellis Drug Discovery Intelligence enables you to get automated alerts on competitor compounds of interest or specific searches relating to your research information needs, keeping you up to date with what is new in your area.

**Example Scenario:** You are a researcher in the field of chronic obstructive pulmonary disease (COPD) and want to find compounds with the same mechanism of action (PDE4Inhibition) as the company’s lead in-house compound. You also want to gain an overview into the competitive landscape and a greater scientific understanding from the data related to these compounds.

Save a search query:

Run a Quick Search in the **Drugs & Biologics** knowledge area, e.g., for **“phosphodiesterase PDE4A Inhibitors”**.

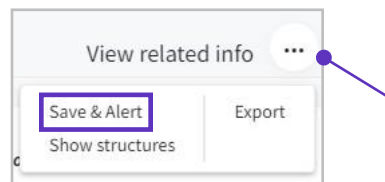

On the results page, you can use the **Apply Filters** button on the top left to refine your results, e.g., **Lead compound-> Yes**

The screenshot shows the 'Product List' view of search results for 'Phosphodiesterase PDE4A Inhibitors'. An 'Apply Filters' modal is open on the left, showing various filter categories. The 'Lead Compound' filter is selected, with 'Yes (28)' checked and 'No (40)' unchecked. A blue arrow points from the tip text to the '(28)' in the 'Yes (28)' option.

| Entry | Milestone Phase | Code Name | Generic Name | Brand Name | Product Category       | Therapeutic Group   | Mechanism of Action                | Organization                        |
|-------|-----------------|-----------|--------------|------------|------------------------|---|------------------------------------|-------------------------------------|
|       |                 |           |              |            | Nuclear Imaging Agents | Diagnosis of Neurological Disorders                         | Phosphodiesterase PDE4A Inhibitors | National Institute of Mental Health |
|       |                 |           |              |            | Radiopharmaceuticals   | Medical Diagnosis   | Phosphodiesterase PDE4B Inhibitors | Pfizer (Originator)                 |
|       |                 |           |              |            |                        |   | Phosphodiesterase PDE4C Inhibitors |                                     |
|       |                 |           |              |            |                        |   | Phosphodiesterase PDE4D Inhibitors |                                     |
|       |                 |           |              |            |                        | Asthma Therapy  | Cytokine Modulators                | Pfizer (Originator)                 |
|       |                 |           |              |            |                        | Chronic Obstructive Pulmonary Diseases (COPD), Treatment of | Phosphodiesterase PDE4A Inhibitors |                                     |

**Tip:** The number of results available behind each filter is displayed in parenthesis.

Once the search results are retrieved, click on the **Options** menu at the top right of the page and choose **Save & Alert**.

### Save & Alert

Query Name  [Add description](#)

**Details**

Query "Phosphodiesterase PDE4A Inhibitors"

Knowledge Area Drugs & Biologics (23 Results)

Filters Lead Compound (1)

Set up an Alert

Alert settings

Frequency Weekly

The Save & Alert box opens, where you can add a **Query Name** and a **Description** for your search.

To **Set up an Alert**, tick the checkbox and choose the alert frequency, e.g. **Weekly**.

### Share settings

You will receive notification by e-mail about records that are new or that are removed from your search results set over time.

Email(s)

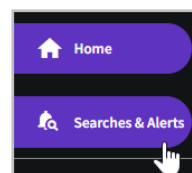

Add more emails separated by (,) commas.

[Cancel](#) [Save](#)

Share your alerts with your colleagues by entering their email address under **Share settings**. Once you're done with the setup, click on **Save**.

### Managing your alerts:

To manage your existing alerts, go to the **Searches & Alerts** tab on the left-hand navigator.
