Trusted expertise

Receive expert guidance from advisors with decades of experience across multiple fields.

Research performance practice areas

Our Academia & Government Consulting team is located around the world. Many of the services they offer are listed below but they can do so much more. Come to us with your questions and we will help you to find the answers.

Services	Delivery
Research enterprise health check	We provide an objective evaluation of the academic research portfolio at an institution. Research output, impact, collaboration and IP generation is benchmarked with client chosen set of peers.
Program evaluation	We provide an independent analysis of awarded research grant impact as part of governmental oversight and review.
Logic model and KPI development	We build logic models and KPIs to capture your defined research performance criteria, aligning to your strategic goals and program implementations.
Researcher portfolio retrospectives	We provide a view of how your institutional culture compares to the broader community through analyses of researcher gender, mobility and more.
Talent identification	We can identify a tailored group of experts based on criteria established in collaboration with the client. Discover rising stars, key opinion leaders or peer review talent.
R&D landscape analysis	We develop a comprehensive database compiling journals, conferences, and other sources showing activity in areas of strategic importance, trend analysis and recommend areas with potential.
Expert review management	We establish and manage the grant review process. We establish reviewer qualifications; contact, recruit and onboard reviewers, then collate feedback and assessments of each application.
Research grant reporting	We provide quantitative analysis of past grant applications and identify areas of underperformance per funder with recommended areas for improvement.
Research horizon scanning	We deliver data-informed forecasts of future research needs in specialized areas to inform capital investments.
Workforce development: Researcher workshops	We develop and deliver learning opportunities for researchers to help improve research performance across the whole lifecycle, including; publishing, patents, ethics, and grant proposal development.
Reputation and position	Using peer benchmarking, Web of Science data used in 75% of the world's evaluation exercises or any other relevant data source, we identify a strategy to strengthen your institution's standing in comparison with other top institutions.
