

Supercharge student engagement with course materials and academic texts

Academic success is rooted in students' ability to read and critically understand scholarly content. Alethea unlocks their potential to do just that.

Students often face challenges in digesting academic materials and text-heavy assignments. This is particularly evident among first-year and first-generation students who must adapt to self-directed learning. Coupled with rising concerns over the misuse of chatbots, nurturing healthy learning skills is crucial.

Alethea supports students in creating meaningful engagement with course materials through proven reading methodologies and Academic AI. By breaking down academic texts into manageable pieces and organizing them into meaningful categories, Alethea helps students comprehend, make new connections, and apply what they learn.

For faculty, the AI-driven Instructor Assistant helps generate effective questions for all course readings. Faculty also gain valuable insights into students' reading habits, allowing them to adapt teaching methodologies and refine learning resources to support and enhance student success.

"Thanks to Alethea, student engagement and participation was by far better than any previous classes I've taught."

Michelle Kaufman,
Associate Professor at a leading
Public Health School

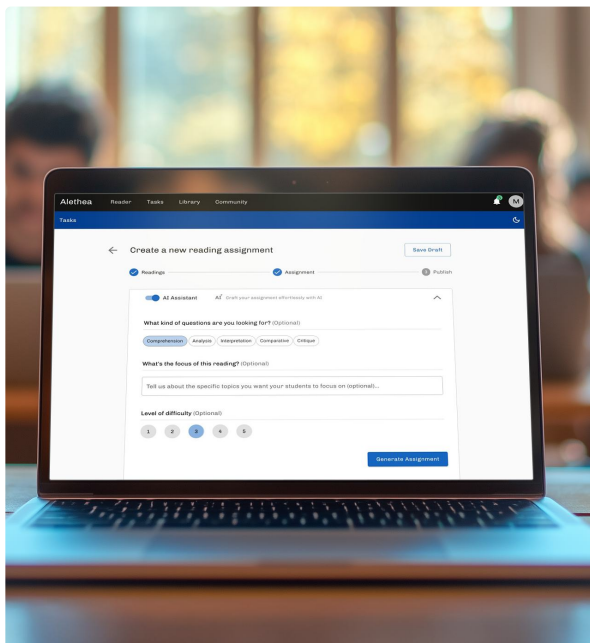

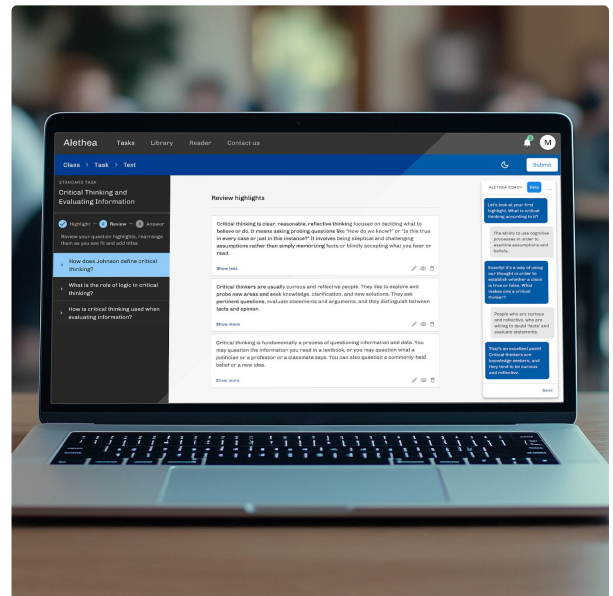

Alethea for students

Think of Alethea as your automated teaching assistant, at scale:

- **Confidence:** Guiding students to the core of their readings, helping distill takeaways and setting them up for class discussions.
- **Focus:** Creating an engaging reading experience while eliminating task-switching and attention-splitting, thus strengthening reading fluency.
- **Skill:** Nurturing critical thinking skills that will serve students for their entire academic journey.
- **Productivity:** Offering students 24/7 support through the AI-powered Academic Coach, allowing them to become independent learners.

“Alethea kept me motivated through its structured approach and engaging prompts. It was easy to track my progress.”

Student, MacEwan University

Alethea for faculty & instructors

- **Time-saving:** Quickly generate practical reading assignments with the Instructor Assistant, freeing up time for teaching and student engagement.
- **Learning for every level:** Tailor the difficulty of questions to match the varying levels of student understanding, ensuring assignments are appropriately challenging across diverse student abilities.
- **Data-rich:** Gain insights to identify students at risk of falling behind and get actionable data to optimize course and library resources.
- **Confidence in AI integration:** Seamlessly incorporate trusted AI into teaching practices, adhering to core teaching principles while enhancing efficiency and instructional quality.

“I’m thrilled with how our library is seeing the return on investment of our library collections through Alethea.”

Dr. Tracy Elliott, Library Dean, Florida Gulf Coast University

Getting started is easy.

Alethea supports the latest LTI standards, which means it can easily integrate with all learning management platforms. And its workflows are intuitive, allowing for quick onboarding and rapid deployment for new courses.

With Alethea, your students have a companion at their side. It's more than just reading — it's a path to understanding, engaging, and succeeding.
