

Get clean researcher profiles with Author Match Service

Don't have the bandwidth to effectively gather and manage your researcher's publications?

Whether you're just starting a new profiling initiative or simply need to update your institution's existing data, Clarivate™ can accelerate and ease the process of gathering and managing your researchers' publications.

With Author Match Service, our team of experts create, build and

manage your researcher dataset for you. Using a combination of machine learning and human curation to match your departments and researchers to their publications in the Web of Science™, we create a dataset you can use to populate profiling systems such as InCites™ My Organization, Esploro, and more.

**Accelerate and
ease the process
of gathering and
managing your
publications.**

Regular updates

Author datasets are updated three times per year based on your list of researchers and departments, reflecting any researcher or organizational changes that may occur.

Efficient process

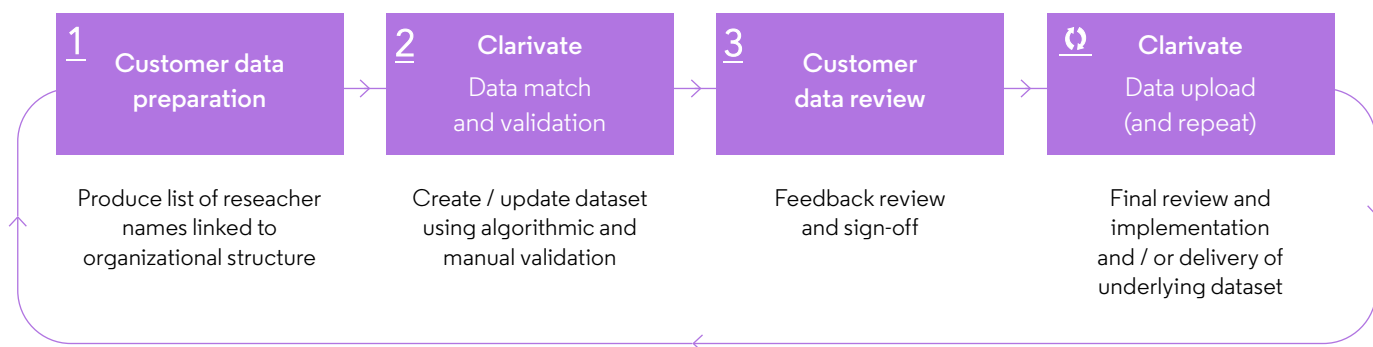

Save time and money by minimizing manual data entry and validation for stakeholders across your institution.

Reliable data

By using a combination of semi-automated and manual validation, we provide you with the most reliable matching possible.

Figure 1: How does the Author Match Service work?

Data preparation

The Author Match Service can help you with data preparation for upload into InCites My Organization. The following data points are required for all active researchers at your institution:

- First name / last name (along with any known variants if readily available)
- Email address
- Identification number or other institutional unique ID
- Departmental structure, formatted to InCites My Organization requirements.

Data license

Additional data updates are provided every four months, including any researcher or organizational changes that may occur.

Process overview

Clarivate service providers offer both semi-automated and manual validation services to ensure you are working from the most reliable data.

Identification:

We use proprietary technologies and algorithmically disambiguated author and institutional data from the Web of Science Core Collection to identify publications likely published by your faculty members.

Matching and manual curation:

We match identified publications to all active researchers provided by your institution, and then manually curate the data to review for errors, mismatches or unmatched publications to generate a final file.

Feedback and sign off:

We send you the final file for additional feedback and require sign-off from named administrators from your institution prior to submission and upload within My Organization.

About Clarivate

Clarivate is a leading global information services provider. We connect people and organizations to intelligence they can trust to transform their perspective, their work and our world. Our subscription and technology-based solutions are coupled with deep domain expertise and cover the areas of Academia & Government, Life Sciences & Healthcare and Intellectual Property.
