Bridging the gap between research and policy

Academic research serves as an important decision-support resource for policymakers and analysts.

Policy documents help researchers orient their research toward the needs of policy experts.

The growing volume of published and grey literature makes it difficult for experts in any industry to keep up.

Integrating policy documents into Web of Science

Introducing the Policy Citation Index

The screenshot displays the 'DOCUMENTS' tab of the Web of Science interface. At the top, there are two tabs: 'DOCUMENTS' (active) and 'RESEARCHERS'. Below the tabs, there is a search bar with the text 'Search in: All Databases ^ Collections: All v'. To the left of the search bar, there is a 'FIELD SEARCH' section with a 'Topic' dropdown menu and a '+ Add row' button. The search filters list includes the following items: Data Citation Index, Derwent Innovations Index, FSTA® - the food science resource, Grants Index, Inspec®, KCI-Korean Journal Database, MEDLINE®, Policy Citation Index (highlighted with a 'New' badge), Preprint Citation Index, and ProQuest™ Dissertations & Theses Citation Index. On the right side of the interface, there is a detailed description for the 'Policy Citation Index (1950-2024)'. The description states: 'Discover published policy reports from leading government, think tanks, and other non-government organizations. View cited references and navigate to research publications used to formulate public policy recommendations.' Below the description, there is a list of bullet points: 'Multidisciplinary.', 'Refine and analyze results to discover policy trends.', and 'Discover research used to formulate policy.'

Connecting 200K+ policy documents from 500+ sources worldwide to the Web of Science network

Web of Science Policy Citation Index

Diverse sources

Content is sourced from a wide range of organizations, including government agencies, NGOs and think tanks around the world.

Streamlined discovery

Policy papers are cross-searchable with a wide array of other research outputs and embedded into the existing workflows of users.

Citation linking

Reports are linked to the research papers they reference, helping researchers demonstrate the societal impact of their cited work.

Align your research to real-world challenges

The screenshot shows a research article titled "An Assessment of Urban Water Demand Forecasts in California". The article is by Abraham, S (Abraham, Sonali); Diringer, S (Diringer, Sarah); Cooley, H (Cooley, Heather) and was published on Aug 05 2020. The document type is a Report. The abstract discusses the decline in urban per capita water demand in California and the implications for future water demand estimation. The article is cited by three other works:
