

Identical Screening Search

Rapid global insight

Qualities

- Identical search in a unique database that includes all trademarks that were first published after 1 January 1976. Search for all trademarks that are identical or phonetically identical to your trademark.
- Screening of more than 20 million trademarks in 200 different countries.
- The database is completed daily with about 9,000 trademarks.
- Overview of the first publications (without modifications or changes).
- Within 4 hours you will be informed of the existence of your trademark in the world.
- Clear reporting that mentions per trademark the applicant, register and class/classes it was registered in. (Status information is available upon request.)

Varieties

- Order worldwide, regional or country-specific searches.
- Possibility to perform an Applicant Identical Screening Search. A strategic argument, for example, during an acquisition. It gives a candidate purchaser the chance to understand the trademarks that a company has in its portfolio worldwide.
- Prefix Identical Screening Search for trademarks with a three, four or five letter prefix. (Only the alphabetical prefix is searched.)
- The report can be supplemented with logos (if published after 1990).

Your advantages

Exclusive and worldwide

This is the only truly worldwide database for a reliable first elimination of identical trademarks.

Fast and cost reducing

Within 4 hours a high-level screening will be performed. Thanks to this first elimination round, you can start the next phase in your trademark search in a more focused and cost efficient manner.

Clear reporting

The results are compiled in a clear report that is written in your own language.
