

See the broader picture with global IP case data

Gain greater context for your brand decisions with Darts-ip

Access the most complete, global collection of searchable IP cases together with trusted trademark content. That's the power of Darts-ip and CompuMark™ together. With a single, unified workflow you can gain insight on trademark prosecution and litigation history at every stage of the process – screening, clearance and protection. Make more informed decisions with a clear and comprehensive view of trademark registration, administrative and judicial cases, litigation insights, and common and civil law data. Darts-ip data is seamlessly integrated with trademark records in the Analysis Tool on SERION®, for maximum efficiency.

Make decisions with greater context

Analyze trademark data and related cases on a single platform.

Save time and reduce your costs

Quickly zero in on relevant case information to accelerate decision-making.

Optimize your legal strategy

Monitor and analyze litigation activity for key competitive brands and their owners.

Global trademark and IP case data in a single, unified platform

One process, multiple views

Together, CompuMark and Darts-ip combine previously time-consuming workflow processes into a single, efficient and comprehensive analysis. Within the Analysis Tool on SERION, instantly view a mark's history of office actions and litigation across screening, search and watch results, including:

- **Plaintiff view.** See how many actions the owner has initiated against others to assess the owner's enforcement behaviors.
- **Defendant view.** See the history of an owner as defendant in a legal action initiated by another party or by a trademark office.
- **Case history.** View recent trademark cases in which the mark was involved, and whether the owner was plaintiff or defendant.
- **Mark notoriety.** See whether a mark has claimed to be famous or have a reputation in legal proceedings.

A unique resource

Darts-ip is the largest and most complete database for global intellectual property cases, with more than 3 million administrative and judicial trademark cases collected from over 140 countries and over 3,500 courts –plus copyright and domain cases.

Darts-ip collects and digitizes global IP case data, making it easily searchable. Combining this resource with CompuMark's trademark databases, the world's largest, gives you integrated access to a wealth of information unavailable anywhere else.

3.3M

trademark cases from over 140 countries

More context for better decisions

Together, CompuMark and Darts-ip provide the insight to help enhance your decision-making and improve your efficiency.

- Assess the likelihood of success of registering your trademark or opposing someone else's mark with insight on an owner's litigiousness and enforcement behavior.
- Access analysis of legal issues and litigation analytics in a clear, easy-to-digest view to inform legal and strategic decisions and reduce risk.
- Gain insights on brand owners and relevant cases for planning competitive or litigation strategies.
- Streamline your workflow by consolidating trademark availability and case data in a single, efficient platform.
