

## Cortellis Clinical Trials Intelligence

# Position trials for success from day one

### Identify and understand the landscape

Increasing the chances of clinical success requires meticulous planning from protocol design to site selection, but gathering the necessary data to design protocols, identify sites, choose endpoints and validate biomarkers is resource intensive. Cortellis Clinical Trials Intelligence™ integrates expertly curated clinical trial protocol and design information, global sites data and intuitive analytics in a single, integrated solution.

Leverage unique and granular scientific indexing of each trial to support protocol design

Identify sites that have familiarity with working with specific biomarkers and patient segments

Select and analyze experienced and reliable sites to speed up trial recruitment

Reduce the workload of identifying and understanding competitive clinical trial strategies

### Gain the highest level of confidence and make data-driven decisions

#### Robust data

**384K+**

global clinical trials

**34K+**

trials related to rare diseases

**200K+**

clinical sites in 200+ countries

**46K+**

trial sponsors

**3,300+**

drugs with orphan drug designation

**813K+**

biomarkers tagged to 200K+ trials

#### Expert team

PhD- and MD-level research professionals with 25+ years of experience

Scientific expertise spanning drug development, biomarker discovery, computer and data science

Clinical knowledge and industry expertise, including project management and trial program practices & processes

#### Therapeutic expertise

**30+**

therapeutic areas

**2,900+**

diseases covered

**“When planning trials for a disease in which we do not have much experience, [Cortellis Clinical Trials Intelligence] can help us identify and select potential sites that have experience and can recruit patients based on [similar] trials.”**

**Clinical operations lead  
Top 50 Pharma**

### Unlock the hidden insights in data

Make the most informed protocol and sites decisions to maximize your clinical investments while reducing risk with fully searchable and indexed global clinical trial content for global sites, drugs, biologics, devices, biomarkers and more – all curated by experienced industry analysts.

#### End-to-end workflow

Identify, analyze and select experienced and reliable clinical trial sites to speed up trial recruitment and increase chances of trial success.

#### Integrated data

Support your teams with an intuitive database that combines data from trial registries, conferences, press releases and more.

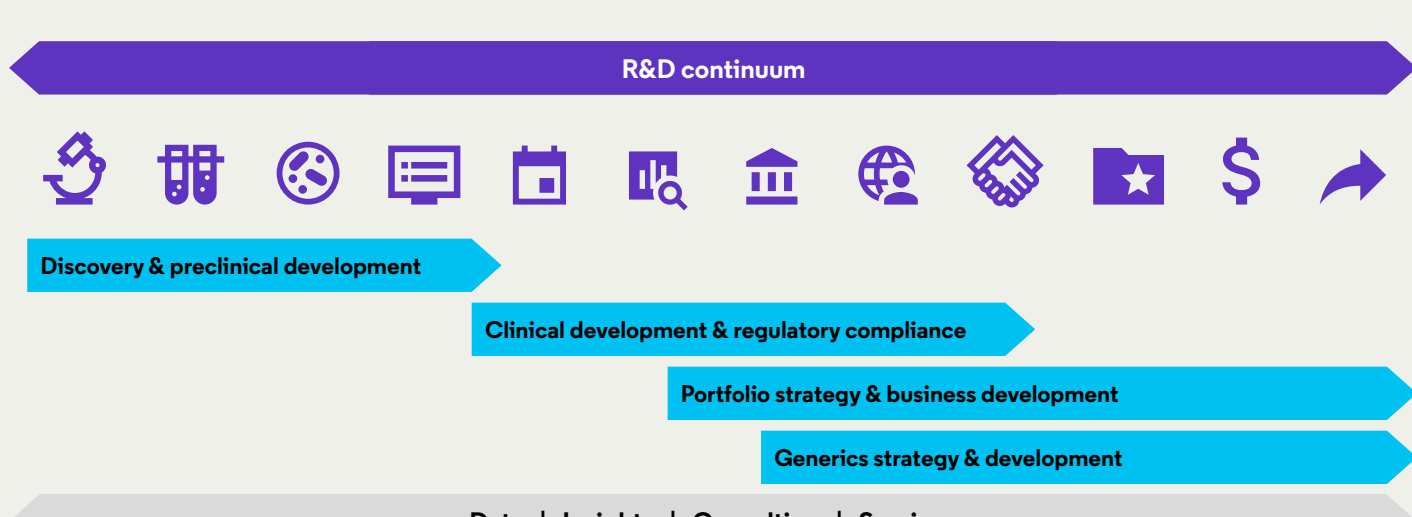

#### Precise analysis

Access granular insights into sites, endpoints, biomarkers, patient segments, protocols and more using accurate, targeted and easy-to-digest data.

### Access trusted intelligence integrated across the R&D lifecycle

Make data-driven decisions with speed and certainty across the drug and device development lifecycle with the Cortellis suite of life science intelligence solutions - including customized consulting and services delivered to your specific requirements. Only Cortellis delivers the insights needed to accelerate innovation with confidence.

### Make better decisions and accelerate innovation
