

Cortellis Generic Intelligence

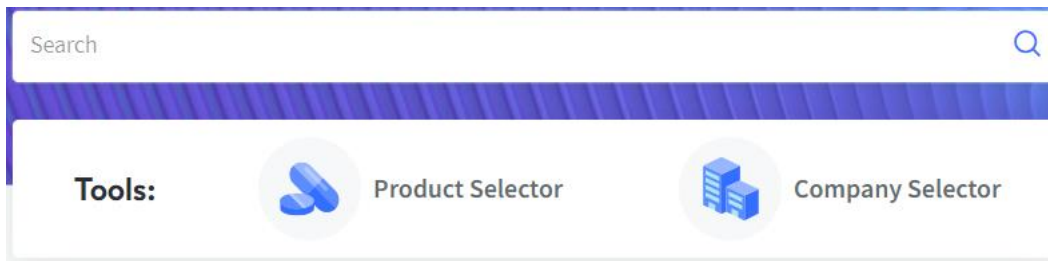

Product Selector Tool

Quickly identify products – drugs or biologics - that match your portfolio and business goals.

Example

Find biologics launched as injectables losing exclusivity in the USA after the 1st of January 2022 with limited amounts of API availability on the market.

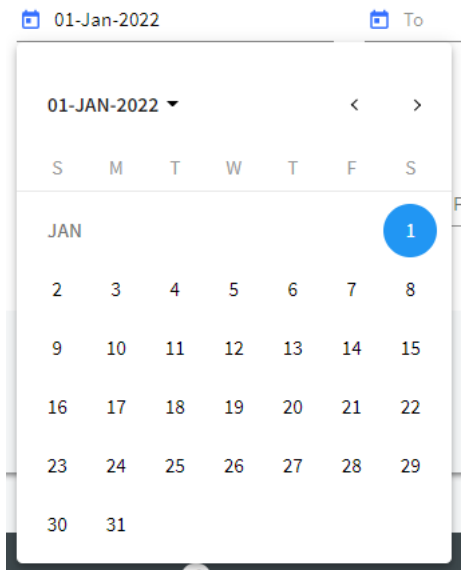

1. Click on the **Product Selector** tool on the Homepage.

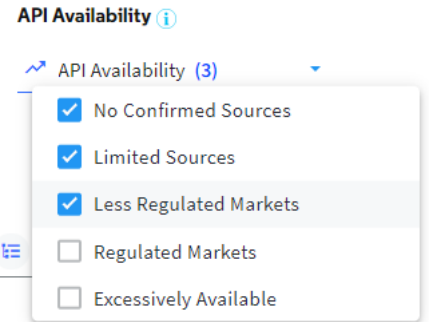

2. Add your criteria to the form. For our example:
 - a. Enter in the **Constraint Date Forecast***, From menu your loss of exclusivity date – 1st January 2022.
 - b. Choose USA from **the Country/Territory** menu.

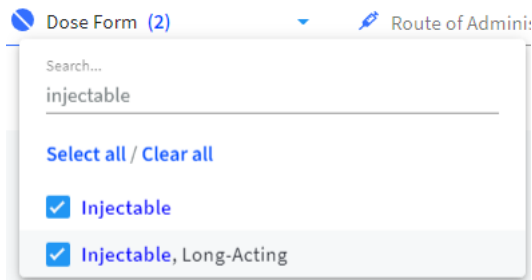

Constraint Date Forecast

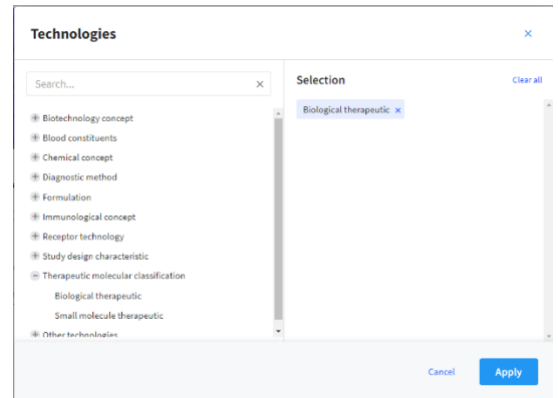

- c. To choose limited amounts of API let's select under **API Availability**, No Confirmed Sources, Limited Sources and Less Regulated Markets.

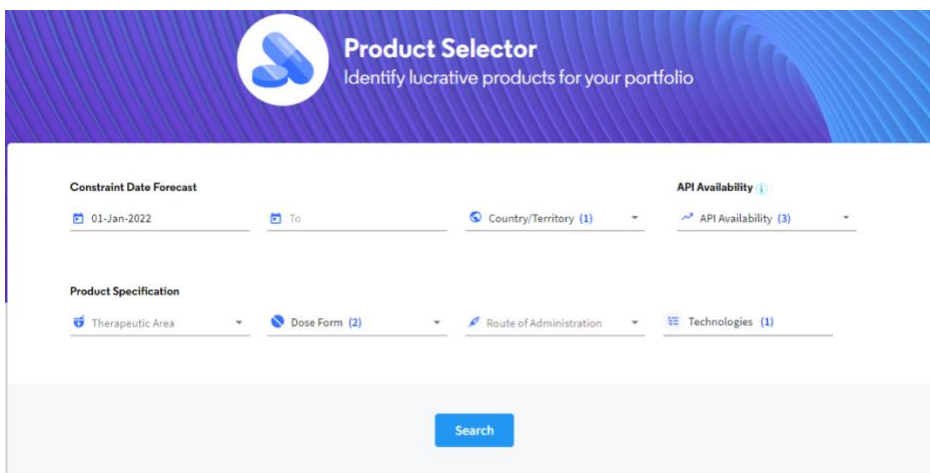

- d. Under **Dose form**, make your selections – Injectable and Injectable, Long-Acting.

- e. Under the **Technologies** index and Therapeutic molecular classification select, Biological Therapeutic and click **Apply**.

3. Click **Search** to see your results.
