

Cortellis Competitive Intelligence

Which type of drugs are included in Cortellis?

Cortellis Competitive Intelligence gathers data from hundreds of scientific and commercial sources to provide the information you need when evaluating drugs in your field of research. All therapy areas are included as well as rare diseases.

Cortellis focuses on prescription drugs -patent protected- and developed for human use since 1990s. Coverage starts in discovery phase and continues through preclinical, clinical trials, approval process until the drug is launched or discontinued.

Small molecules, biologics, drug combinations, biosimilars, salts and new versions of existing drugs with an element of innovation -like a new formulation- are also included in Cortellis.

The following are examples of types of drugs you will find and how to search for them.

1. Type the name of the drug in Quick Search.

2. Original and related drugs will be listed in the results table where indexing information is available to help you quickly identify mechanism of action, indication, company, and other details for each drug.

Drug Name	Active Companies	Active Indications	Target-based Actions	Highest Status	Regulatory Designations
