

Regulatory Intelligence: Setting up countries or regions in Cortellis

In Cortellis Regulatory Intelligence you can limit your results to your countries or regions of interest. This guide highlights how to set up the “My Regions” filter, as well as how to switch it on and off as needed when searching and browsing so you can focus on just the content important to you.

1. Once you have logged in, you can access **My Regions** via the **Settings** menu at the top of the screen. Simply hover over your name to begin.

The screenshot shows the Cortellis Regulatory Intelligence interface. At the top right, the user's name 'Beth Wise' is visible next to a globe icon and 'EN'. A dropdown menu is open, showing 'Settings' with sub-items: 'My Account', 'My Preferences', 'My Regions' (highlighted with a mouse cursor), and 'Sign Out'. Below this is an 'Advanced search' button. The main content area has a 'Regulatory' header with 'Analytics Tools' and 'Covid-19 Regulation Tracker' buttons. Below that are tabs for 'All', 'Comparison Tables', 'Intelligence Reports', and 'Regulatory Summaries'. A search bar is present with the placeholder text 'Document title, topic, country, reference number...' and a 'Search' button. Below the search bar are filter buttons: 'Country/Region', 'Topic', 'Document Type', 'Document Category', 'Date Filter', 'Last Updated', 'All other filters', and 'Reset Filters'. At the bottom, there are two tabs: 'Drugs and Biologics' and 'Medical Devices and IVDs'. The 'Medical Devices and IVDs' tab is active, showing a list of regions with checkboxes. The 'Asia Pacific' region is selected, and all its sub-regions are checked. A 'Save' button is at the bottom right of the region selection panel.

2. Using the check boxes, select the regions and countries you want to include. Regions you do not subscribe to appear dimmed. Once finished click **Save**.

If you subscribe to both the **Drugs & Biologics** and the **Medical Devices and IVDs** modules, you will need to click on each tab to set your regions and countries for each module separately.

In this example all of Asia Pacific has been selected for Drugs and Biologics and all of Latin America for Medical Devices and IVDs.

- To apply **My Regions** when searching or browsing, select the **Country/Region** filter and toggle **My Regions** to the on position, then click **Apply**.
