

Cortellis Drug Discovery Intelligence

Identify undisclosed structures via related patents

Sometimes drug structures are not disclosed by their Organization. Cortellis Drug Discovery Intelligence offers you a quick way to identify potential structures for those drugs.

1. When a drug's structure is not yet disclosed, it will be stated within the drug record under **Product Properties**, like in the case of Refanalin.

Refanalin A

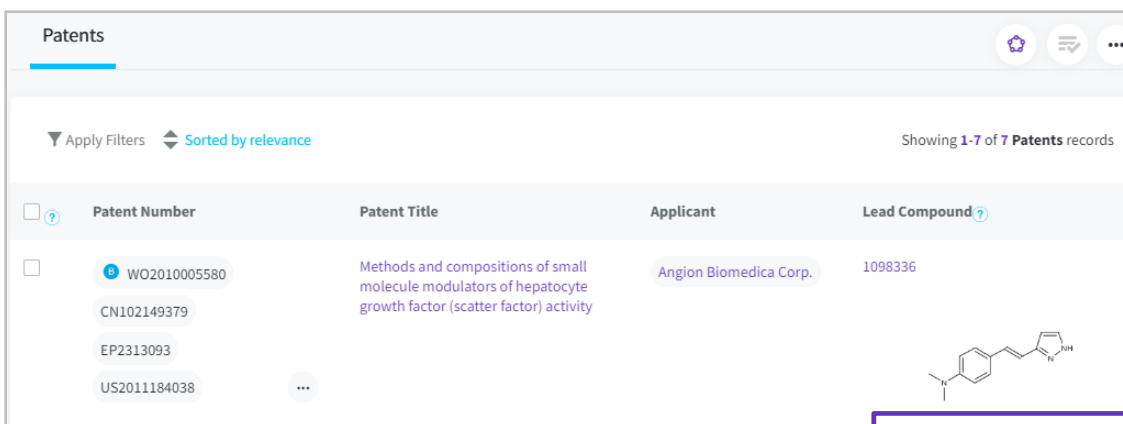

Product Development Status Milestones

Product Properties

Structure not yet disclosed
There are patents that are potentially related to the product via Mechanism of Action and Organization.

[View Patents](#)

2. Click on **View Patents** to retrieve a list of Patents potentially associated to your drug via Mechanism of Action and Organization, in this case Hepatocyte Growth Factor (HGF) Mimetics and Angion Biomedica Corp.

Patents

Apply Filters Sorted by relevance Showing 1-7 of 7 Patents records

Patent Number	Patent Title	Applicant	Lead Compound
<input type="checkbox"/> <ul style="list-style-type: none"> WO2010005580 CN102149379 EP2313093 US2011184038 	Methods and compositions of small molecule modulators of hepatocyte growth factor (scatter factor) activity	Angion Biomedica Corp.	1098336

CN(C)C1=CC=C(C=C1)/C=C/C2=CC=CC=C2O

Any of the structures associated to these patents could belong to Refanalin.
