

Navigating to related content types in Cortellis

Cortellis information is organized in different types of reports: Drugs, Companies, Deals, Clinical Trials and more. All of these reports are indexed by the editorial team and integrated to make it easy for users to find related information and learn more about:

- The company developing a drug
- Drugs being studied in a clinical trial
- Deals associated to a drug
- Drugs linked to a patent
- And more

This guide explains how to navigate around different content types in Cortellis.

1. From individual reports to related information

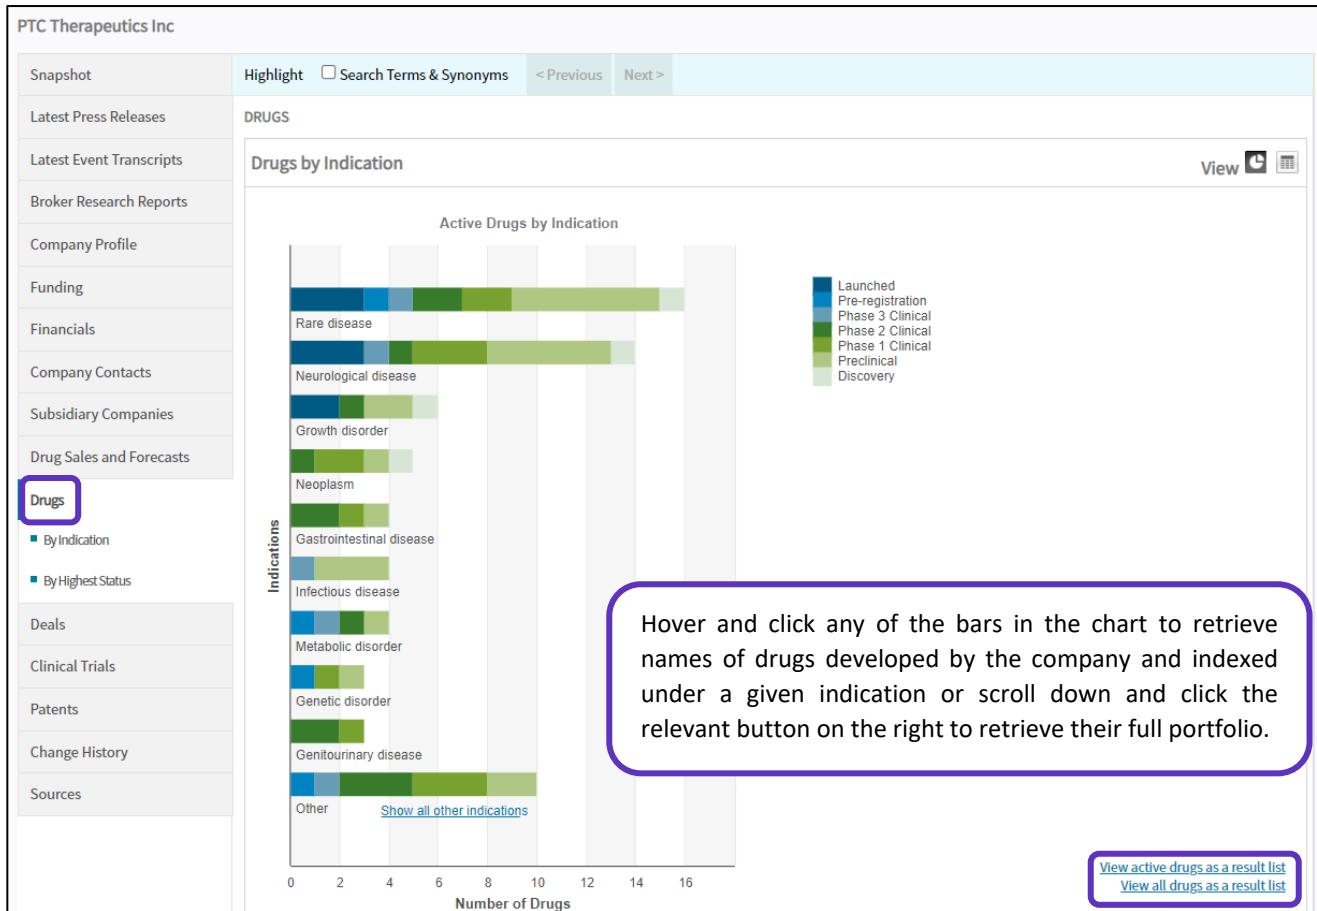

Users can navigate from a drug report to the report of the company currently or previously developing the drug with just one click from the 'Snapshot' tab, as shown next:

deflazacort (oral tablet/suspension, Duchenne muscular dystrophy), PCT Therapeutics

Snapshot	Highlight	<input type="checkbox"/> Search Terms & Synonyms	< Previous	Next >
Latest Press Releases	SNAPSHOT			
Latest Event Transcripts	Drug Name	deflazacort (oral tablet/suspension, Duchenne muscular dystrophy), PCT Therapeutics		
Broker Research Reports	Other Drug Names	deflazacort; deflazacort (Duchenne muscular dystrophy), Marathon Pharmaceuticals; deflazacort (oral tablet, Duchenne muscular dystrophy), Marathon Pharmaceuticals; deflazacort (oral tablet/suspension, Duchenne muscular dystrophy), Marathon Pharmaceuticals; Emflaza; MP-104; deflazacort (oral tablet/suspension, Duchenne muscular dystrophy), PCT Therapeutics		
Development Profile	Originator Company	Marathon Pharmaceuticals LLC		
Literature Review	Active Companies	PTC Therapeutics Inc		
Development Status	Therapy Area	Immune; Musculoskeletal		
Regulatory Designations	Inactive Companies	Marathon Pharmaceuticals LLC		
Milestones	Highest Status	Launched (Duchenne dystrophy - US - May-2017)		
Chemical Structures	Regulatory Designations	Fast Track; Orphan Drug; Rare Pediatric Disease		
Drug Names	Active Indications	Duchenne dystrophy		View Epidemiology in IPD
Sales and Forecasts				
Clinical Trials				
Deals and Patents	Go to 'Deals and Patents' tab to access a summary chart and links to go to these content types.			

This will allow them to access the company's profile - created by the editorial team - and drug pipeline, to evaluate the company as a potential business partner or competitor.

Similarly, users can retrieve the full list of drugs, deals, clinical trials, patents or press releases associated to a company from the relevant tabs in a Cortellis company report.

Patent and Deal reports also have links to related information in relevant tabs whereas Press Release, Conference and Clinical Trial reports display links to associated companies and drugs from the 'Snapshot' tab.

2. From result sets

Users can navigate from a result set displaying drugs, for example, to a different result set displaying clinical trials, companies or deals associated with those drugs simply by using the 'Related Content' button.

Related Content to 227 Selected Drugs

[View Related Clinical Trials](#)

[View Related Active Companies](#)

[View Related Deals](#)

Here are some examples of the different types of navigation available from Cortellis result sets:

- From a group of drugs to the list of companies currently involved in their development/commercialization.

- From a group of deals to the list of associated drugs.
- From a group of clinical trials to the list of companies running those trials.
- From a group of companies to the list of active drugs in their portfolio.
- And more.

Users can always return to previous result sets by using the back button
