

Be alerted of new drugs in your space

Cortellis Competitive Intelligence

This guide explains how to set up alerts to monitor updates on drugs in just a few clicks. Alerts are available at your fingertips from drug results and individual reports in Cortellis Competitive Intelligence.

When looking for drug information, you only need to run your search once because next time Cortellis can rerun your search automatically and send you updates on competitor drugs and any new drugs in your field via email. This will help you keep an eye on new drugs presented at recent conferences and drugs changing phases of development, for example.

All you need to do is set up an alert and then you can carry on with your daily activities while Cortellis monitors your results and sends you updates daily, weekly or monthly.

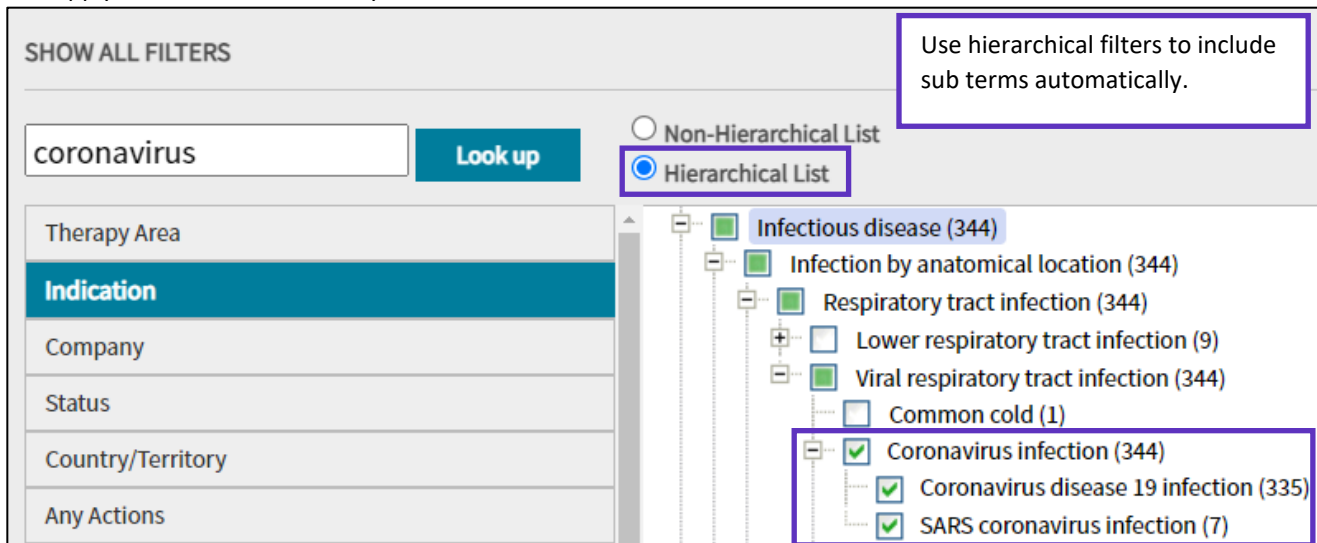

Example: Monitor new and existing drugs preclinical phase for coronavirus infection.

1. Run your search by indication, technology or mechanism of action.

Search bar containing the text "coronavirus". To the right of the search bar are two buttons: "Index" and "Full Text", both with magnifying glass icons.

2. Apply filters to narrow down your results.

The screenshot shows the Cortellis filter interface. On the left, there is a "SHOW ALL FILTERS" section with a search bar containing "coronavirus" and a "Look up" button. Below the search bar are several filter categories: "Therapy Area", "Indication" (highlighted in blue), "Company", "Status", "Country/Territory", and "Any Actions". On the right, there is a hierarchical list of terms. The "Hierarchical List" option is selected. The list includes "Infectious disease (344)", "Infection by anatomical location (344)", "Respiratory tract infection (344)", "Lower respiratory tract infection (9)", "Viral respiratory tract infection (344)", "Common cold (1)", "Coronavirus infection (344)", "Coronavirus disease 19 infection (335)", and "SARS coronavirus infection (7)". A callout box points to the "Hierarchical List" option with the text "Use hierarchical filters to include sub terms automatically." Another callout box points to the "Coronavirus infection (344)" and its sub-terms, which are checked with green boxes.

| | |
|-------------------|---|
| Therapy Area | <input type="checkbox"/> Launched (27) |
| Indication | <input type="checkbox"/> Registered (38) |
| Company | <input type="checkbox"/> Pre-registration (23) |
| Status | <input type="checkbox"/> Phase 3 Clinical (167) |
| Country/Territory | <input type="checkbox"/> Phase 2 Clinical (274) |
| Any Actions | <input type="checkbox"/> Phase 1 Clinical (135) |
| Technologies | <input type="checkbox"/> Clinical (47) |
| Added Date | <input checked="" type="checkbox"/> Preclinical (644) |

3. Click "Save and Alert" button -top right- from the results page.
