Save search queries and setup alerts
Cortellis Drug Discovery Intelligence

Want to be up to date in your research area? Do not want to miss new competitor compounds?

Cortellis Drug Discovery Intelligence enables you to get automated alerts on competitor compounds of interest or specific searches relating to your research information needs, keeping you up to date with what is new in your area.

Example Scenario: You are a researcher in the field of chronic obstructive pulmonary disease (COPD) and want to find compounds with the same mechanism of action (PDE4Inhibition) as the company’s lead in-house compound. You also want to gain an overview into the competitive landscape and a greater scientific understanding from the data related to these compounds.

Save a search query:

Run a Quick Search in the Drugs & Biologics knowledge area, e.g., for “phosphodiesterase PDE4A Inhibitors”.

On the results page, you can use the Apply Filters button on the top left to refine your results, e.g., Lead compound> Yes

Tip: The number of results available behind each filter is displayed in parenthesis.
Once the search results are retrieved, click on the **Options** menu at the top right of the page and choose **Save & Alert**.

The Save & Alert box opens, where you can add a **Query Name** and a **Description** for your search.

To **Set up an Alert**, tick the checkbox and choose the alert frequency, e.g., **Weekly**.

Share your alerts with your colleagues by entering their email address under **Share settings**. Once you’re done with the setup, click on **Save**.

Managing your alerts:

To manage your existing alerts, go to the **Searches & Alerts** tab on the left-hand navigator.

All saved queries and alerts can be found here. You can **Edit**, **Run** and **Delete** your query under the **Actions** column.

Monitor newly added indexed terms:

Use the Controlled Vocabulary tab to set up alerts to be notified when new terms are created within Cortellis Drug Discovery Intelligence, i.e., new Mechanism of Action, or a new Organization.
