

Exploring the boom
in blockchain or
distributed ledger
patent filings

Blockchain—disruption or hype?

Fast patent facts:*

60% of all blockchain
inventions published in the
last 300 days

44 new inventions
published per working
day since November

currently 200 new
entrants per month

9K

new blockchain
inventions per year

*As of May 15, 2019

What is blockchain?

Secure records or transactions where information is stored in blocks of data:

cryptographic
memory of the
previous records

multiple instances to
avoid changes being
made to the original
data

encoded data be
viewed, checked and
added

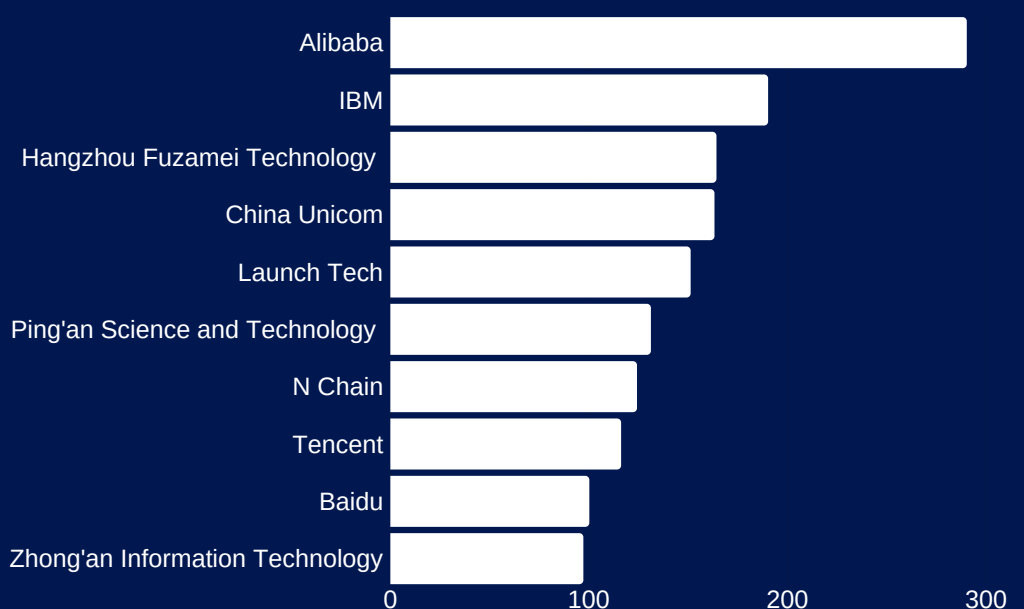

Vital next-level technology for secure transactions in multiple industries

Quick look at the Patent Landscape
