

Derwent World Patents Index

The world's most trusted source of curated patent intelligence

Make your decisions with confidence. Boost your patent research with authoritative and accurate data contained within the Derwent World Patents Index™ (DWPI). DWPI is the world's most trusted source of patent information, expertly indexed and featuring enhanced titles and comprehensive abstracts.

With DWPI, you will improve your ability to find innovations that you would otherwise miss and quickly determine the novelty of an invention. DWPI empowers you to uncover patent information that you can trust to make IP decisions with confidence.

Worldwide sources

Global patent coverage you won't find anywhere else – in English

DWPI gives you the most extensive view of activity in emerging and growing markets by providing the world's most comprehensive collection of global patent data in English – translated from 30 languages. At a global level, you can track the invention status of a single invention from one place, saving you valuable research time.

Coverage includes:

- Superior global patent coverage, including the Asia-Pacific region, in English
- 61 worldwide sources, including both the major and emerging centers of innovation and defensive publications
- Quickly evolving technology areas, including utility models that might otherwise be overlooked
- Over 36 million patent families covering more than 100 million patent documents worldwide
- Broad industry coverage across all technologies

Patent data made accurate by industry experts helping you find what's important to you

Our highly qualified, scientifically trained editors review, analyze and enhance the patent information from global authorities, creating English language summaries that make it faster and easier to find reliable results.

On average, our editors identify and correct 800-1,000 priority errors per week from raw patent data records. These corrections are then uploaded to DWPI.

Each DWPI record features:

- Clear titles and abstracts written to summarize the novelty, use and advantage of an invention
- Error-corrected bibliographic information provides more consistency in searching and better data analysis
- Editorial rules and consistent, industry specific terms are applied to each record, allowing for accurate retrieval of patent data
- Standardized assignee names help identify patents owned by a company and its subsidiaries

Precision indexing – find innovations that you would otherwise miss

DWPI utilizes unbiased coding and indexing systems, which are intellectually and consistently applied across all patent authorities and technologies – providing unsurpassed search efficiency.

- Unique coding and indexing systems ensure the precise, relevant and accurate retrieval of patent information

- Manual classification codes highlight novel technical aspects of each invention, as well as applications for the technology
- Detailed, in-depth indexing of chemical content allows for structure-based retrieval of specific and Markush compounds, plus polymer indexing and fragmentation codes

Original Chinese patent record

<p>Abstract</p> <p>DWPI Abstract ? (CN101676218A_)</p> <p>Novelty A cold and hot type water purifier comprises a separating film (10) for separating normal temperature water and cooled water in storage container, and a hot water and cold water plug a same with that of horizontal section of cold water storage tank and used for filtering drinking water from directly leaking from side of cold water storage tank without passing through the filter part.</p> <p>Detailed Description A cold and hot type water purifier comprises a storage container used for storing drinking water storage container, container-shaped water supplying storage tank (220) fixed to upper end of storage container, container-shaped water supplying storage tank (220) fixed to upper end of storage container, and a hot water and cold water plug a same with that of horizontal section of the cold water storage tank and used for filtering drinking water from directly leaking from side of cold water storage tank without passing through the filter part. The water supplying storage tank is arranged with an auxiliary filter lower and part of cold water storage tank is wound with a cooling coil pipe (240) as cooling device.</p> <p>Use Cold and hot type water purifier.</p> <p>Advantage Bottom face of separating film for separating cold water storage tank and hot water storage tank put into alkalinescent water containing mineral water. Besides, if an auxiliary filter is additionally a filter with simple connecting element. Thus, capacity of water to be purified can be increased with simple connecting element.</p> <p>Drawing Description The drawing is a perspective view of a cold and hot type water purifier. 10 - Separating film.</p>

Enhanced DWPI abstract

DWPI titles and abstracts are written in English – using clear, consistent industry specific terms, allowing you to quickly identify which patents are important to your work.

"Everyone involved in innovation at Whirlpool Corporation benefits from analysis powered by DWPI. It's the best tool for timely review and provides a quick grasp of patent information for our technology organization."

Steve Kuehl
Principal Technologist & Global IP Coordinator, Whirlpool Corporation

Optimised assignee: AI enhanced intelligence into patent ownership

Who is innovating actively in your space? Which patents should you really pay attention to and who owns them? With Optimized Assignee and Ultimate Parent in Derwent Innovation, you can quickly and accurately discover the answers to questions such as these relating to your competitors. Combining cutting edge technology with the editorial expertise that powers DWPI, a single standardized assignee is created – even though current ownership information may not seem to exist.

Experience the power of DWPI first-hand in your patent research today. Click on the link below to request a free trial of Derwent Innovation:

Derwent Patents Citation Index (DPCI) – obtain all citations relevant to inventions or patent families

Part of the DWPI entitlement in Derwent Innovation, DPCI provides an invention-level view of patent and literature citations, forward and backward.

- Gather comprehensive patent lists faster, freeing time and resources
- Spot and sort the most relevant patents, ensuring key content is captured
- Conduct licensee and competitor analysis with easy-to-review assignee data
- Identify potential infringers quickly and easily to protect IP assets
