## Description

*Research Disclosure* is a defensive-type publication, serving the scientific and patent communities worldwide. The journal is published every month as a paper journal and online database product and contains abstracts describing new discoveries or inventions. The pages of the journal are available to companies who, due to the special nature of the invention, seek a low cost alternative, or supplement, to obtaining patents and require prompt publication whilst maintaining freedom for their own use of that invention.

In effect, the act of publication bars others from obtaining patent rights on the invention described, because the effective date of publication establishes prior art. Disclosures in the journal may be accredited or published anonymously in order to protect company confidentiality.

In many case companies use the publication to supplement the filing of a patent application, especially as patent office patent examiners are required to search *Research Disclosure* by mandate of the *Patent Co-operation Treaty*. Over 50 years of continuous publication many companies and inventors have successfully relied on *Research Disclosure's* publication date in subsequent legal proceedings.

## DWPI Coverage

Kind	DWPI Start Dates
------	------------------

A	Research Disclosures	10 January 1978
---	----------------------	-----------------

For coverage between 1978 and 2001, DWPI publication dates are the 10<sup>th</sup> and application dates the 20<sup>th</sup> of each journal publication month. For 2001 onwards, both DWPI publication and application dates are the 10<sup>th</sup> of each journal publication month.

DWPI Data elements online	Notes
✓ Bibliographic data	
✓ English value-add title and abstract	
✓ Manual Codes	Chemical (CPI) and Electrical (EPI)
✓ Chemical Indexing	DCR, Chemical Fragmentation, Polymer and Markush

## Numeration

### Published Journal Documents

Publication Numbers				
Original Data	Derwent Innovation	Dialog	Questel	STN
