

Emtree Terms Added and Changed (January 2023)

This is an overview of new terms added and changes made in the first Emtree release in 2023.

Overall, Emtree has grown by 1718 preferred terms (315 drug terms and 1403 non-drug terms) compared with the previous version released in September 2022. In total Emtree now counts 96304 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes could include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree Terms Added in January 2023

1816 new terms (including 98 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version January 2023 (compared to September 2022):

- 342 drug terms (terms assigned to the Chemicals and Drugs facet).
- 1474 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2023 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in January 2023

98 terms (71 drug terms and 27 non-drug terms) from Emtree September 2022 have been replaced by 96 different terms in January 2023 (27 drug terms and 69 non-drug terms).

Of these, 92 terms (27 drug terms and 65 non-drug terms) are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2023; the remaining 4 replacement terms (0 drug terms and 4 non-drug terms) were already present in Emtree.

No drug terms were replaced by a non-drug term, No non-drug terms were replaced by a drug term. No preferred terms were deleted.

Changes are presented in alphabetical order of the *new* terms.
