

# Powering research excellence worldwide

# Better data. Better decisions.

Science ministries, research councils, and funding agencies around the world rely on the Web of Science Group to optimize the way that research is conducted and evaluated, at scale. We have the expertise and experience to help you build assessment and analytics capacity, to implement evidence-based strategy, and to evaluate outcomes and impact with high quality data and indicators.

**Market Challenges to Technology Breakthroughs**

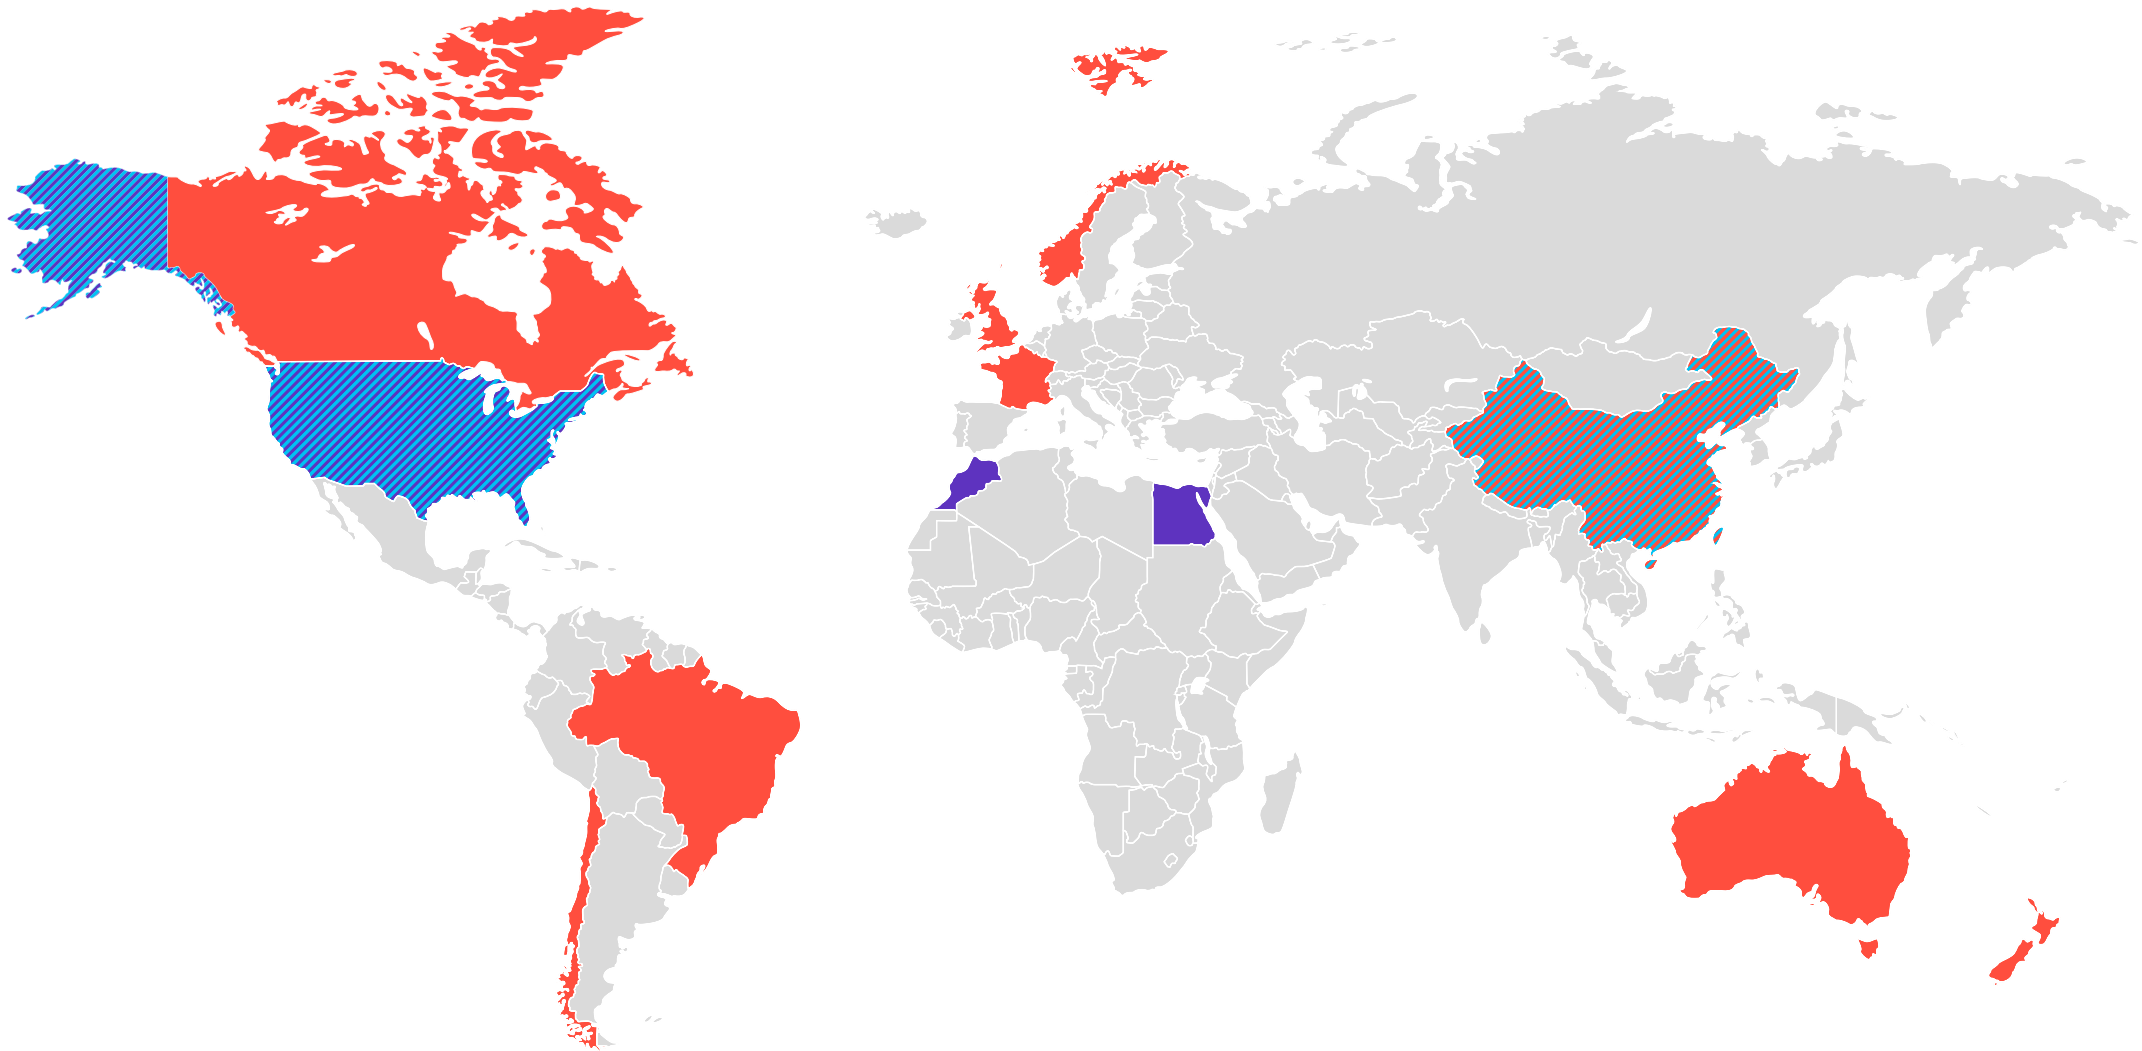

“Unstructured data, as well as data from alternative sources, offers context and depth to analysis, but needs considerable work before it can be used for reliable insights.”

“There is a mismatch between the vision in the boardroom and the reality on the ground.”

**Challenges Answered by Web of Science Group**

**Problem solved!**  
We have created structured data for over 50 years investing millions of human hours.

**Problem solved!**  
Using logic models and related techniques, our expert consultants work with you to ensure your project accounts for all stakeholder perspectives and delivers on your goals.

# Building large-scale analytics and assessment capacity

In addition to providing services and subscriptions, the Web of Science Group has partnered with governments and ministries around the world to create regional citation indices on the *Web of Science* platform. Scholarship is international, and every voice matters – we can help you measure the impact of your local community.

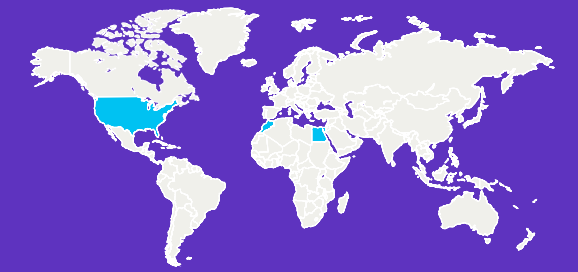

"Pioneering innovations and providence are drivers of achievement: the political leadership in Egypt is focusing on these elements in order to connect an ancient civilization to our present day. EKB is ushering in a vital strategic project which promotes the spread of knowledge in native Arabic to the entire world. The creation of ARCI, a project developed from the wisdom of the political leadership, will be a turning point in our efforts to achieve this goal."

**Mr. Mahmoud Hussein,**  
Project Coordinator,  
Egyptian Knowledge Bank

"Our partnership with Clarivate Analytics illustrates the effort made by our Minister Professor Saïd AMZAZI, to develop scientific research and excellence in our country."

**Mr. Mohamed Khalfaoui,**  
Director of Centre National  
pour la Recherche Scientifique  
et Technique (CNRST), Morocco

**“As centers of learning and catalysts of community change, libraries and museums connect people with programs, services, collections, information and new ideas in the arts, sciences and humanities.”**

Kathryn K. Matthew, director of the IMLS. BNIG Academic

# Delivering insights powered by custom data sets and API's

Drawing upon our own curated, world-class information sources, your internal data, or a combination, we deliver actionable information so that you can confidently take the next step, knowing that it's the right one.

"We hope the Chinese Academy of Sciences and Clarivate Analytics will continue to deepen our collaboration on frontier research and to develop innovative research methods so that our annual Research Fronts report will become a world-class resource of growing influence in advancing global science and technology."

**Prof. Zhang Tao**  
Deputy President of CAS

Clarivate Analytics conducted a set of bibliometric analyses for all citing publications to Dr. Berman's seminal 2000 paper. The citing papers to the Berman paper are [a] proxy to understanding the citation-based impact of the PDB on the research community.

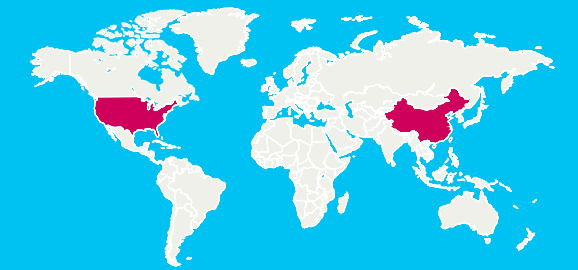

#### The analysis consists of:

1. Overview landscape analysis
2. Research fields analysis
3. Funding organizations analysis

"Our mission is to efficiently and effectively connect researchers with the materials they need to advance innovation and discovery. CADRE will open up the power of data mining to everyone, not only people with specialized expertise."

**John Culshaw, the Jack B. King**  
University Librarian at the UI Libraries.

**Together, these analyses provide a rich picture of the impact that was made by the PDB as indicated by Dr. Berman's foundational work.**

# Powering research assessment and rankings

The Web of Science Group partners in national research assessment exercises in the UK, Norway, China, and Australia, as well as ministry level assessment reports reports in Canada, Chile, Brazil, New Zealand, and France. In addition, our data underpins several rankings programs throughout the world, including the US News & World Report Best Global Universities, the CWTS Leiden Rankings, and the Academic Ranking of World Universities.

"The ARC is pleased to have Clarivate Analytics on board for the 2018 ERA round. The citation data from Clarivate Analytics and a comprehensive data collection submitted by Australian universities will help inform panels of experts to determine the research quality in each unit of evaluation. The ARC continues to consult with the research community about the indicators used and developed for ERA."

**Professor Sue Thomas, CEO, Australian Research Council**

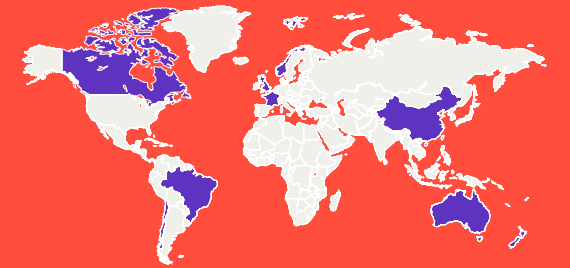

"We are pleased to be working with Clarivate Analytics on the provision of citation information for REF 2021. The use of citation data in this exercise presents a key opportunity to build on the principles of the responsible use of metrics, following the Metric Tide report, and we look forward to working with the ISI team and the panels on this task."

**Dr. Kim Hackett, REF Director**

"The access to world data will provide completely new opportunities for analyzing the results of research in the form of scientific publishing. This is especially important for international comparative studies, comparisons of Norway with other countries, as well as more basic research on scientific publishing. It will allow us to monitor, understand and investigate the effects of research policy measures and instruments."

**Sveinung Skule, Director of NIFU**

**"The access to world data will provide completely new opportunities for analyzing the results of research in the form of scientific publishing."**

**Sveinung Skule, Director of NIFU**
