

SEP Analyzer

Make confident licensing decisions with clean, objective SEP data.

SEP Analyzer streamlines research, provides insights into competitor portfolios, and provides an edge in negotiations

Standard essential patents—known as SEPs—are vital to implementing technological standards. They ensure interoperability, compatibility and efficiency across various devices and systems and they protect technology that’s essential to implementing industry standards.

While the role of SEPs is most significant in the field of telecommunications, their scope of relevance is growing as more and more industries look to implement smart technologies in their products and workflows.

As demand grows for standard essential patents, so too does the need to understand SEP ownership structures.

Historically, it’s been difficult to analyze SEP data from ETSI to inform licensing decisions because owner information isn’t normalized, SEPs aren’t categorized by generation and the data isn’t structured for analysis.

That’s why we developed the SEP Analyzer.

Innography's SEP Analyzer enables you to:

Get clean, objective SEP data in seconds

Trust the quality of your data knowing it’s been cleaned, parsed and meticulously tagged by in-house experts

Gain more insights by adding layers to your competitive analysis

Accelerate multi-party negotiations with third-party data

SEP Analyzer: simplifying standard essential patent data

Now, patent strategists and licensing professionals can easily analyze declared standard essential patents from ETSI and get clean, objective data—in seconds. Innography SEP Analyzer enables users to:

- Gain a complete understanding of SEP ownership structures—including parent and subsidiary relationships—so you can accurately calculate FRAND rates and boost your negotiating position.
- Analyze the makeup, strength, and breadth of competitors' SEP portfolios.
- Have confidence in the quality of your data knowing that it's been manually cleaned, normalized and mapped to technology standards by in-house specialists
- Accelerate negotiations between licensors and licensees.
- Give meaning to your data with visualizations—like bar charts and graphs—enabling you to easily draw conclusions and make informed decisions.
- See results of your analysis in seconds and easily export them to share with clients, colleagues and counter-parties.
- Find patents that are similar to your original selection and perform patent landscaping to gain insights into a particular technology, industry, or competitive space.

SEP Analyzer is designed for flexibility so you can tailor your analysis to meet your specifications and get the precise insights you need.
