

Simplify collaboration with local agents worldwide

Seamlessly connect with your agent network to save time, reduce risk and improve coordination for international patent and trademark filing and prosecution.

Imagine a world in which corporations and law firms are seamlessly connected with local agents. Where instructions are delivered on time — without a flood of emails. And where staff can focus on optimizing and executing IP strategy outcomes, not on time-consuming administrative work.

With IP Collaboration Hub from Clarivate™, that world is now yours.

IP Collaboration Hub is a powerful collaboration solution that transforms the process of communicating with agents worldwide. This centralized collaboration portal captures and structures prosecution events, dramatically simplifying the process of managing communications with your global agent network, saving time and reducing unnecessary pressures.

Reduce the number of email exchanges using IP Collaboration Hub.

IP Collaboration Hub dramatically simplifies and streamlines every aspect of local agent communication and coordination. When integrated with our FoundationIP™ and Memotech™ IP management systems, it provides a seamless solution for optimizing global IP management.

Transform productivity

Send instructions to agents in multiple jurisdictions with a single click — eliminating emails. Manage your entire foreign filing and prosecution process from a single, structured collaboration portal fully integrated with your IP management system (IPMS).

Save valuable time

Dramatically reduce time spent assembling documents and communicating with agents. Check the status of agent activity in seconds. Speed up docketing by eliminating the need to re-key information in your IPMS and upload/download documents.

Reduce business risk

The structured process with a single source of truth is inherently less risky. Eliminate errors or missing documents when sending instructions. Avoid mistakes that could lead to loss of your IP rights. Expand centralized task management to your agents, maximizing efficiency.

Remove friction from foreign filing and prosecution activities. Collaborate more effectively and efficiently with local agents across jurisdictions. Free your staff from administrative burdens and focus on IP tasks that drive business value.
