

Take your search further with other Clarivate solutions

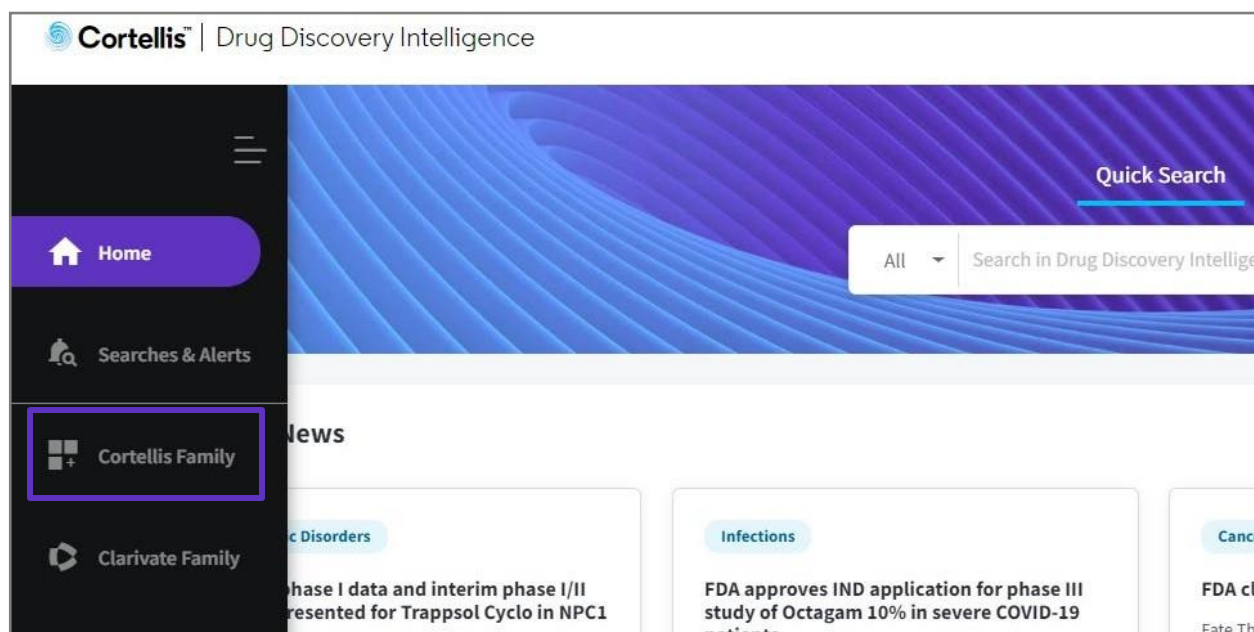

Cortellis Drug Discovery Intelligence

Cortellis Drug Discovery Intelligence is one of the many Clarivate solutions within the Life Sciences family. While this platform focuses on preclinical development, other solutions focus on:

- Target validation - [Target Druggability](#)
- Pathway analysis - [MetaCore](#)
- Drug and target safety assessment – [OFF-X](#)
- Competitive Intelligence - [Cortellis](#)

In this guide, you will learn how Cortellis Drug Discovery Intelligence connects to these other solutions and allows you to take your searches further:

1. From the left-side menu, click on **Cortellis Family** to seamlessly access Cortellis.

- From a target record, access other solutions under **Clarivate Links** on the lower right-side menu.

The screenshot shows the 'chitinase, acidic' target record. The 'General Information' section includes details like Name, Gene Symbol (CHIA), Synonyms, Organism, Mechanisms, Description, and Last Updated Date. A callout box titled 'Clarivate Links' is overlaid on the right, showing 'Target Druggability' (TD), 'OFF-X', '2 Safety Alerts', and 'Metacore' (CHIA). A blue arrow points from the 'Clarivate Links' label in the bottom right corner of the main interface to the callout box.

- From a drug record, access other solutions under **Clarivate Links** on the lower right-side menu.

The screenshot shows the 'Adalimumab' drug record on the Cortellis Drug Discovery Intelligence platform. The 'Product Properties' section displays sequence information and other details. A callout box titled 'Clarivate Links' is overlaid on the right, showing 'OFF-X' and '2239 Safety Alerts'. The 'Related Content' section on the right lists various categories and their counts.
