

How do I... find a company?

Company Records for subsidiaries and corporate groups provide a quick assessment of a company including key information on countries where they operate, API manufacturing, patent data, approval information, regulatory information and more.

1. Begin by typing the name of your company into the search bar and choose from the drop-down list. Icons appear to indicate corporate groups.

2. The Key Insights Tab displays a series of tabs providing key data and analytics.

3. Select **Subsidiaries** to see all of the subsidiaries that are part of a corporate company. Each subsidiary has its own Subsidiary Key Insights page with more details to help you find opportunities or the competition.
