ACTIVE INGREDIENT	MANUFACTURING STATUS	REGULATORY FILINGS	GMP CERTIFICATES	FIRST ASSOCIATED DATE
bupropion hydrobromide	Early API Activity	US DMF	No data	15-Dec-2023

Glossary:

Manufacturing Status is the relationship between the API and the manufacturing site, according to Cortellis Product Intelligence. There are 6 different levels of Manufacturing Status, shown next:

- **Commercially Available** - Cortellis Product Intelligence has confirmed with multiple sources that the site is producing or is capable of producing commercial quantities of the API.
- **Under Development** - Cortellis Product Intelligence has confirmed with multiple sources that the site is developing a process or scaling up production of the API.
- **Early** - Cortellis Product Intelligence has learned within the last year that there may be a connection between the API and the manufacturing site but has not yet validated this information with multiple sources.
- **Unconfirmed** - Cortellis Product Intelligence has not been able to confirm or has conflicting information from multiple sources concerning the status of development at this site.
- **Innovator or Marketer** - API is manufactured by the marketer and/or innovator of the branded product or by a third party for exclusive use by the innovator/marketer.
- **Not Manufacturing** - Cortellis Product Intelligence has either confirmed that the company is not (and never was) manufacturing this API, had at some time in the past manufactured this API, or is trading another company's API.

Corporate API Rating as proprietary analytic that indicates how capable the corporate group is of supplying bulk API to regulated markets, i.e. Western Europe and North America. This pertains to all API the company manufactures and not just the molecule in the specific API reports. There are 6 different levels of Corporate API rating, shown next:

- **Big Pharma** - Innovative companies with at least \$1.0B USD in annual R&D expenditures
- **Well Established** - Companies with years of experience supplying active ingredients to regulated market.
- **Established** - Less of a track record in supplying to regulated markets, either in terms of years of history or number of products supplied. Still considered as capable of supplying regulated markets.
- **Potential** - Interest in supplying regulated markets, but with limited or no known performance.
- **Local** - Supplying only to their local and other less-regulated markets; do not currently have the capability of passing inspections by regulatory bodies like the US FDA.
- **Unrated** - Companies for which Cortellis Product Intelligence has not assigned a rating.
