

What is the API Availability?

The API Availability Rating is a proprietary analytic that makes it easy to understand the current availability of the active ingredient for regulated markets. Regulated markets include Western Europe and North America. The API Availability can be found on the Product Key Insights Page and it's also a searchable field in the Product Selector Tool.

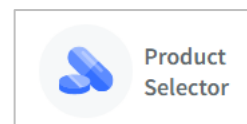

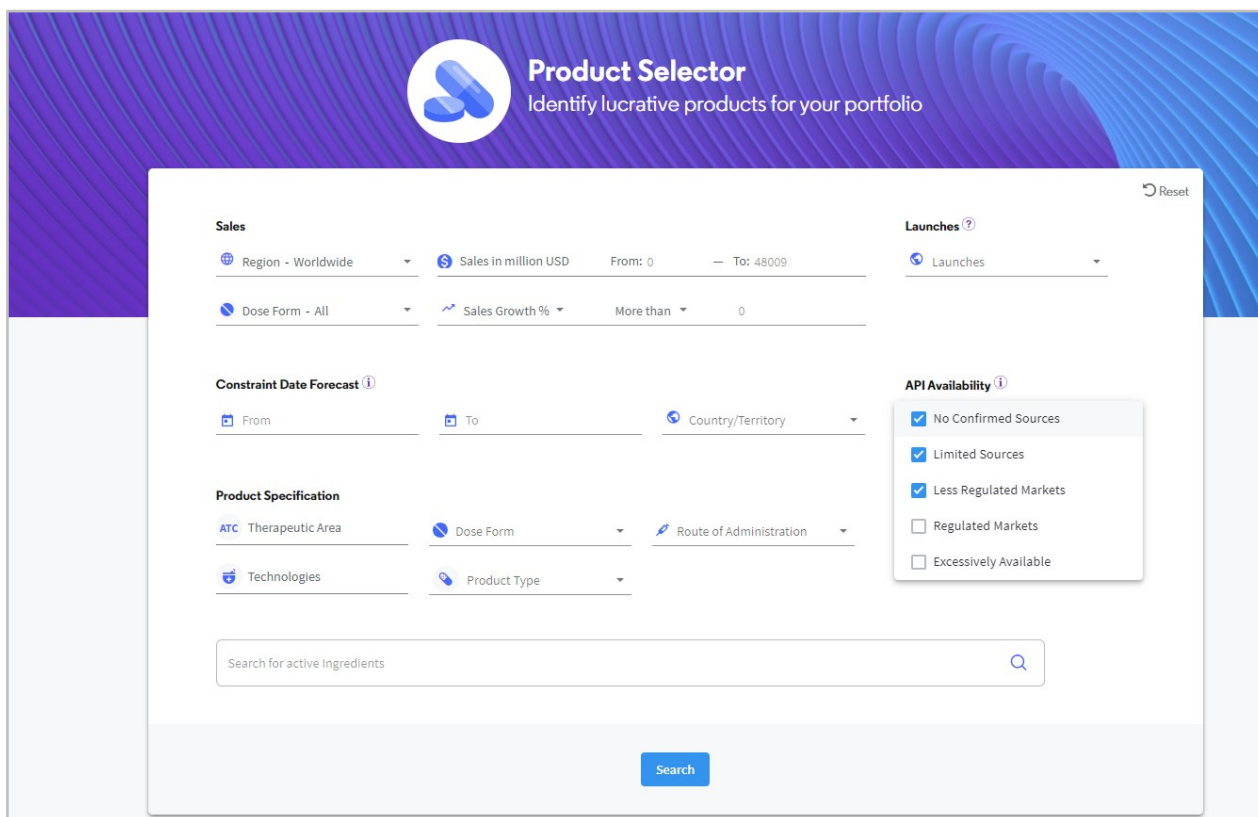

- **No Confirmed Sources** – No confirmed sources of the active ingredient exist in regulated or less regulated markets.
- **Limited Sources** – Limited sources of the active ingredient exist in regulated and/or less regulated markets.
- **Less Regulated Markets** – The active ingredient is available for use in less regulated markets and may be available in limited quantities for regulated markets.
- **Regulated Markets** – The active ingredient can readily be found for use in regulated markets.
- **Excessively Available** – The active ingredient is readily available for regulated markets and supply exceeds demand.

Product Selector Tool Search using the API Availability Field

Example: Find API with limited amounts of API on the market.

1. Go to the Product Selector Tool by clicking the pill icon
2. Make your selection in the API availability field
3. Add additional desired criteria and search

The screenshot shows the Product Selector tool interface. At the top, there's a header with the 'Product Selector' logo and the tagline 'Identify lucrative products for your portfolio'. Below this, the interface is divided into several sections for filtering products:

- Sales:** Includes filters for Region (Worldwide), Sales in million USD (From: 0, To: 48009), Dose Form (All), and Sales Growth % (More than 0).
- Constraint Date Forecast:** Includes filters for From, To, and Country/Territory.
- Product Specification:** Includes filters for ATC Therapeutic Area, Dose Form, Route of Administration, Technologies, and Product Type.
- API Availability:** A dropdown menu showing options: No Confirmed Sources, Limited Sources (checked), Less Regulated Markets, Regulated Markets, and Excessively Available.
- Launches:** A dropdown menu for Launches.

At the bottom, there is a search bar labeled 'Search for active ingredients' and a 'Search' button.
