

De-risk your supply chain

Mitigate the risk of disruptions and proactively develop response strategies with global API sourcing data.

Identify and screen suitable global manufacturers for your API of interest.

Monitor manufacturing facilities and identify potential risks.

Determine each supplier's experience and regulatory compliance.

Explore contract manufacturers with specific capabilities.

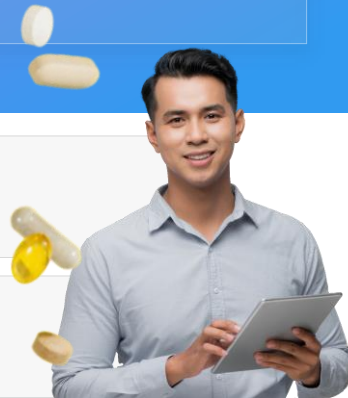

Understand the excipients, reagents and intermediates used in the API processes that your supply chain relies on.

Build robust, resilient supply chains:

- Searchable source of curated supply chain intel that maps API and finished dose manufacturers and marketeers for U.S. marketed products.
- Match supply with demand by leveraging sales and consumption data and market share analysis.

"Cortellis Product Intelligence has been a great investment for us, saving us time and money while improving productivity."

Dr. Johann Christian Zechel, Helm AG

"This platform saves considerable time, easy to navigate, easy to download and use information as desired and hence it is productive and progressive tool for an organization."

Amit Bansal, Sanofi Aventis
