

Export/Import Module

The Export/Import Module in Cortellis Product Intelligence provides the strategic edge needed to protect supply chains and seize opportunities. It provides timely visibility into global shipments of APIs and finished dose forms - who's shipping, what's moving, where it's going, and how much it's worth. You can easily detect sourcing risk early, identify new suppliers, benchmark trade activity by site or partner, and spot emerging demand signals.

Example: Identify companies importing teriflunomide from Alembic and MSN in India.

In **Quick Search** enter the name of the product and select it from the dropdown menu that appears.

1. In the **Product Report** select the **Export & Import Shipments** tab from the top menu and **API and Finished Dose Exports**.
