

Epidemiology Intelligence

2024 Coverage

1. Epidemiology Intelligence overview

Epidemiology Intelligence is your single source of patient population intelligence, featuring a unique combination of incidence and prevalence literature review, in-depth disease-specific forecasts and U.S. claims-based insights.

Epidemiology Intelligence - Incidence and Prevalence subscription offers comprehensive coverage across 1200+ diseases and procedures. This extensive incidence and prevalence literature review allows you to conduct thorough market assessment quickly across many indications, including rare diseases.

Epidemiology Intelligence also offers **in-depth expert analysis**, empowering you to dive deep into expert disease-specific epidemiology analysis and forecasts across 220 indications and over 5000 patient populations. Coverage includes detailed 10- or 20-year forecasts in 45 countries. Topline epidemiology estimates for an additional 126 countries are included in our Extrapolated Worldwide Coverage (part of the global subscription). This brochure outlines the disease and geographies covered in the Epidemiology Intelligence in-depth expert analysis.

2. Geographic coverage

G7 (Mature Markets)

This region comprises the seven largest (by market value) mature pharmaceutical markets:

- France
- Germany
- Italy
- Japan
- Spain
- The United Kingdom
- The United States

All of our forecasts are available for these countries, although in some cases Japan may not be included.

For most of these forecasts, the forecast period is 20 years, except for many infectious diseases and forecasts of drug-treated populations, which typically extend to 10 years.

Global / Geographic Regions¹

This geographic regional coverage comprises key large emerging countries as well as many smaller rich countries. The data are reported separately for different sub-regions:

- **North America:** Canada, also includes United States from G7
- **Asia Pacific:** Australia, China, Hong Kong, India, Indonesia, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, Thailand, Vietnam, also includes Japan from G7
- **Europe:** Austria, Belgium, Czech Republic, Denmark, Finland, Greece, Netherlands, Norway, Poland, Portugal, Russia, Switzerland, Turkey, also includes France, Germany, Italy, Spain, and United Kingdom from G7
- **South/Latin America:** Argentina, Brazil, Chile, Colombia, Mexico, Peru
- **Middle East & Africa:** Egypt, Nigeria, South Africa, Saudi Arabia

These forecasts are typically made over a 10-year period.

Every country is reported only in one region. For some indications, coverage across all countries within a region may be incomplete. For most indications with coverage across all regions, Extrapolated Worldwide Coverage expands coverage to a further 126 countries.

“**NEW**” denotes coverage that will be made available during 2024.

¹ Countries previously covered as “Emerging Markets” (Brazil, China, India, Mexico, Russia, South Korea, and Turkey) are now available as part of Global and regional subscriptions.

3. Autoimmune and inflammation
