

Interactive Regulatory Intelligence Dashboards

Turn complex multi-source datasets into clear, actionable insights designed for regulatory, pharmacovigilance and clinical teams

A Simple, Actionable Tool.

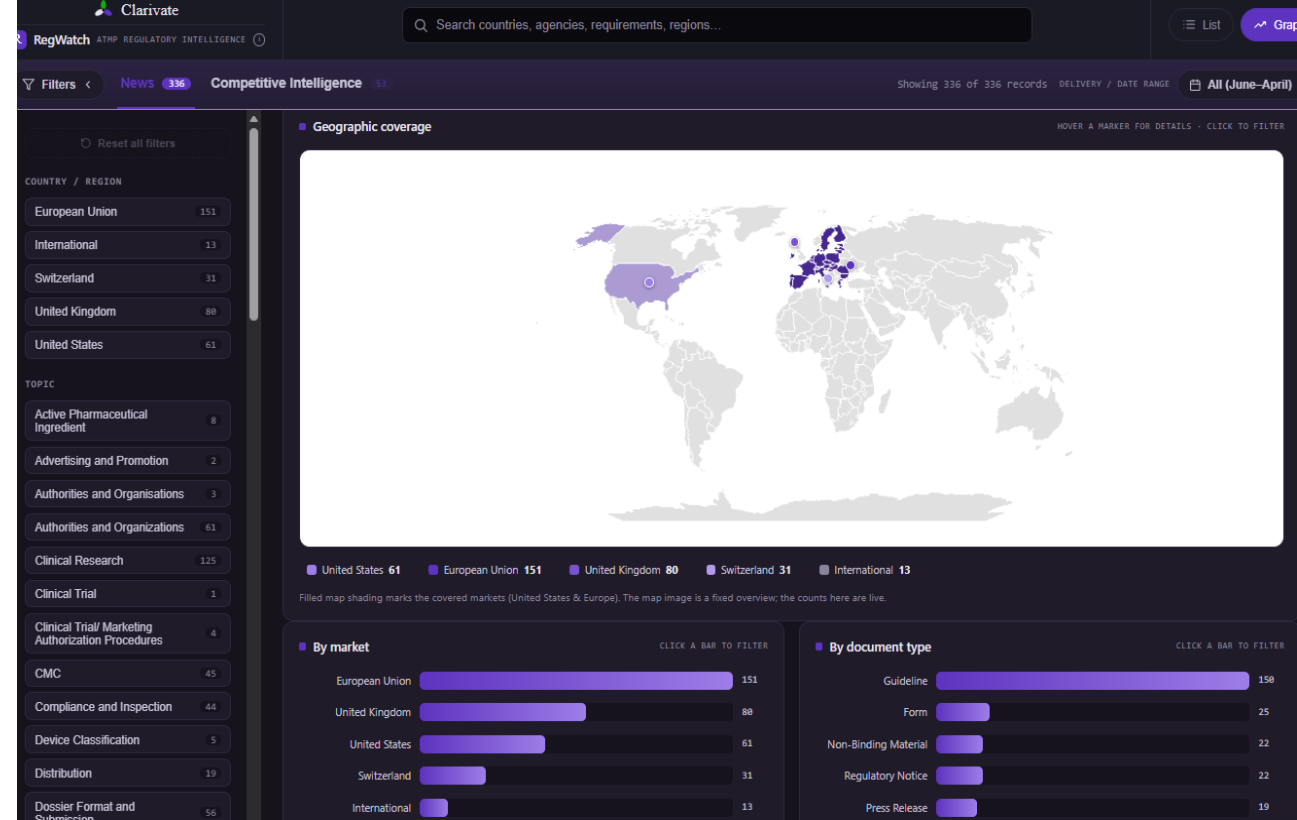

Whether you are managing regulatory intelligence for clinical trials, pre- or post-marketing safety, or global compliance strategies, this is a simple actionable tool designed for regulatory, pharmacovigilance and clinical teams to help:

- Reduce compliance risks
- Save time by creating efficiencies
- Make faster, more confident decisions

Smart and Informed Decision-Making.

Our centralized, interactive intelligence dashboards provide a decision engine for global compliance:

- Structured regulatory requirements across markets including comparisons
- Standardized data fields with embedded sources and references
- Interactive and integrated search, filtering, and comparison tools

Key Capabilities

- **Smart search** delivers instant answers to global requirements—no spreadsheets.
- **Global comparability** shows cross-country differences instantly.
- **Visual insights** reveal trends and variability at-a-glance.
- **Deep traceability** links directly to requirements and source documents.
- **Always secure** runs in any browser—no install, no Excel, no data movement.
- **Always reliable** preserves read-only data with a consistent layout.

End-User Value

- **Question-driven design** mirrors how teams work—focused on answers, not documents.
- **Faster decision-making** delivers complex answers in seconds, not hours.
- **Reduced compliance risk** improves confidence with structured data and smarter country decisions.
- **Improved global alignment** enables harmonized regulatory, clinical, and PV processes across regions.
