

Fact sheet | Endoscopy device report series

We know medtech

MedTech360 empowers users to make informed strategic decisions, identify opportunities for growth, and respond to changing market conditions.

With a focus on the medical technology industry, using insights from our experts globally, we ensure timely, relevant, and actionable insights that you can leverage to:

Understand the global device space with a clear and comprehensive picture of market potential developed from analysis on market size and forecasts.

Support investment and market entry recommendations with detail on company performance.

Anticipate market threats using reliable data and analysis on the competitive landscape.

Strategic insights for endoscopy companies

Endoscopy device market reports

The global market for minimally invasive devices is impacted by a variety of threats and opportunities for growth, including variable reimbursement landscapes, the underpenetration of technology in emerging markets, the availability of trained physicians, cost-benefit considerations of minimally invasive treatments, and the potential for litigation.

Endoscopy device report series has been designed to help manufacturers invested in minimally invasive therapies navigate this dynamic market landscape in an effective and

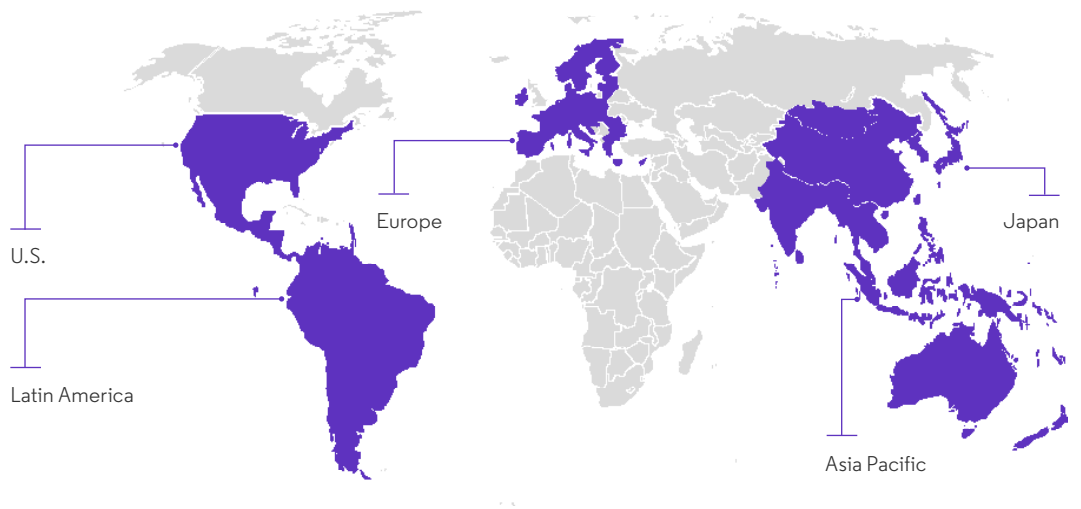

informed manner. The series includes vital features such as market overviews and highlights, detailed competitive landscapes and market revenue comparisons, actionable insights and recommendations, and market share breakdowns for key endoscopic device markets.

Report authors benefit from the contribution of primary research insights from industry and key opinion leaders, in-depth consultation of secondary resources – such as SEC filings and clinical data repositories – and the use of best-in-class internal databases – including Procedure Finder and product lines – to create a comprehensive and insightful product.

Endoscopy device report series has been designed to help manufacturers invested in minimally invasive therapies navigate this dynamic market landscape in an effective and informed manner.

Geography

Markets covered

- Endoscope service
- ENT and bronchoscopy devices
- Gastrointestinal endoscopy devices
- Gynecological devices
- Hernia repair devices
- Laparoscopic devices
- Obesity interventions
- Open surgery instruments
- Reprocessed devices
- Urological devices
- Video and high-tech hardware devices
