

Dear Valued Supplier,

In alignment with the expectations of our executive management, customers, and other stakeholders to manage our business responsibly and to advance a more sustainable world, Clarivate is entering a new chapter in our sustainability journey. We have launched a supply chain sustainability initiative to monitor governance, social, and environmental performance in our supply chain.

Your company, and its subsidiaries, have been identified as a key partner, and we are counting on your participation in this program.

To make this initiative as efficient as possible for both of us, we have selected the EcoVadis Supply Chain Sustainability monitoring platform. EcoVadis combines sustainability expertise and online tools to save you time and resources on completing the assessment and reporting in the years to come. The benefits of becoming a rated supplier on the EcoVadis platform:

- Understanding your company's sustainability performance with an EcoVadis scorecard through a confidential and efficient questionnaire and expert analysis
- Increasing transparency, standardized reporting, and significantly reducing your overall sustainability workload
- Comparing your company's sustainability performance against industry and regional benchmarks for improved competitive advantage
- Sharing your company's sustainability performance with tools such as the EcoVadis Scorecard, EcoVadis Rating Certificate, EcoVadis Medal, Sustainability Assessment Report, and Sustainability Highlights
- Tools for benchmarking and continuous improvement in your sustainability practices, to engage new customers and increase revenue
- Mitigate risks within your Environmental, Social, Governance (ESG) programs

Participation in this program and your performance results will be integrated into Clarivate's sourcing process. To inquire, sign-up or login to the EcoVadis platform, please click here: [Clarivate-EcoVadis Portal](#). The EcoVadis sustainability program is co-financed by Clarivate and you. (Learn more at fees.ecovadis.com).

If you have any questions or concerns, please contact Callie Cummings, Clarivate Sustainability Manager at callie.cummings@clarivate.com.

Thank you in advance for the time you will spend in completing this assessment and joining this strategic initiative to work together for a more sustainable future.

Best Regards,

Peter Frein
