My Organization: A new tool for InCites Benchmarking and Analytics

Completing the research analytics loop to deliver standardized researcher, team and departmental reporting.

Full circle analytics

My Organization is a new integrated module within InCites Benchmarking and Analytics, providing institutions the missing link needed to complete the research analytics loop. My Organization will enable users to easily browse, select and analyze researcher, team or departmental performance based on your own verified data.

You retain full control of your data – importing departmental structure, researcher names, publication records – and My Organization delivers standardized researcher, team and departmental reporting to increase relevance of bibliometric data for all users. Then we complete the loop, as we provide you underlying data from Web of Science and InCites APIs to maintain your Local Profile System.
Available for pre-order
My Organization is currently in Beta testing. It will be available for subscription access in September 2019. Talk to your sales representative for details and pre-order information.

Basics of using My Organization:
1. Administrator role to integrate your researcher profile data in My Organization using our simple import tools.
2. Your researcher outputs are matched to Web of Science Core Collection and automatically imported into My Organization.
3. Any unmatched records are highlighted for review. You can import as frequently as you like.
4. Once the data is imported your users will be able to:
   - Browse and view the organizational structure
   - Export all reports and underlying metrics
   - Seamlessly link to InCites Benchmarking and Analytics to further explore and analyze your team, departments or researchers using citation metrics
5. Get the underlying data from Web of Science and InCites APIs to maintain your Local Profile System.
6. Additionally, explore the My Organization API to directly connect your Local Profile System.

Connectors are provided for VIVO and Converis users by integrating Web of Science API with your local system in order to collect the full meta-data from Web of Science against your researcher profiles.

Benefits of using My Organization:

- Save researchers valuable time, allowing for quick and easy import of their full research history from the Web of Science Core Collection
- Rely upon a standardized dataset without needing end-user validation of research output
- Support annual review process comprehensively and repeatedly
- Seamlessly deliver integrated metrics to all relevant users
- Showcase your institutional research by integrating Web of Science API with your local system in order to collect the full meta-data from Web of Science against your researcher profiles
