Author

Searches these fields: Authors and Group Author. For Authors, enter the last name first followed by a space and the author's initials.

Examples:
johnson m*

× Clear Search

It is often difficult to retrieve an author's publications searching per author's name (especially if multiple authors with the same name and initials)

There is a solution – Author's identifier!

What is author disambiguation?

Name ambiguity is a frequently encountered problem in the scholarly community:

- Different researchers publish under the same name
- Individual researchers publish under many names
- Languages and cultural naming conventions introduce additional challenges

Author disambiguation is a process that aims to find all publications that belong to a given author and distinguish them from publications of other authors who share the same name.

Also published as:

- Avram Noam Chomsky
- N. Chomsky
- نعوم تشومسكي
- נועם חומסקי

FACT: A mere hundred surnames still make up over 85% of China's 1.3 billion citizens. The top three - Wang, Li, and Zhang - cover more than 20% of the population.

- DOI
- Editor

Author Identifiers
Searches the Web of Science ResearcherID and ORCID ID fields. This will return documents authored by the researcher with that Web of Science ResearcherID or ORCID ID.
Examples:
C-1205-2013
0000-0002-8214-5734

If the researcher has claimed the authorship of this paper in Publons and/or in ORCID, then his identifier(s) will appear in the table below the author names, and this paper will be retrieved when searching per identifier.

Author Impact Beamplot

Range: Recent 10 Years

Citation counts are from Web of Science Core Collection; citation percentile data are from InCites. Author Impact Beamplot data is built on a researcher's articles and review documents over their career, back to max 1980.

[How to read this beamplot](#)

Author Impact Beamplot

- Each document is compared to their **YEAR** and **CATEGORY** of publication. Using this comparison, they are each given a set of normalised metrics.
- A Beamplot allows one to visualise in a single figure the normalised percentile of every document a researcher has produced over the course of their career.

Get beyond the h-index with new visualizations that help you see the context of each researcher's scholarly influence over time.

THINGS TO KNOW

- Percentile values are sourced from *InCites Benchmarking & Analytics*.
- Beamplots only include publications with the Web of Science document type *Article* or *Review*.
- Percentiles are calculated for publications back to 1980. Current and previous year publications are excluded from the beamplot.
- Publications may be assigned more than one subject category. The category displayed is the highest performing.

POLYMER CHEMISTRY AND BIOMEDICAL POLYMERS X

My educational background in chemical science brought me to start my career as a researcher. For 15 years, I worked on different R&D projects involving polymers, in French academic institutions as well as for the pharmaceutical industry.
My interest for Intellectual Property started in 2004, when I first discovered the patent world as an

Update my author record & Publons profile

Declare your publications directly from the Web of Science and export them to your Publons profile
Use the same email for your Web of Science and Publons accounts (and avoid duplication of your profile)

Option 1 –
Add one document
at a time

The screenshot shows a Web of Science article page. At the top, there are buttons for 'Free Full Text from Publisher', 'Full Text Links', and a blue graduation cap icon. The article title is 'Dehydroabietic Acid Microencapsulation Potential as Biofilm-Mediated Infections Treatment'. Below the title, the authors are listed: 'By: Neto, I (Neto, Iris) ^{1, 2}; Dominguez-Martin, EM (Dominguez-Martin, Eva Maria) ^{1, 3}; Ntungwe, E (Ntungwe, Epole) ^{1, 3}; Reis, CP (Reis, Carlos) ^{1, 2}; Pesic, M (Pesic, Milica) ⁴; Faustino, C (Faustino, Celia) ²; Rijo, P (Rijo, Patricia) ^{1, 2}'. Below the authors, there is a link to 'View Web of Science ResearcherID and ORCID (provided by Clarivate)'. The journal information is 'PHARMACEUTICS', Volume: 13, Issue: 6, Article Number: 825, and DOI: 10.3390/pharmaceutics13060825. On the right side, the 'Export' menu is open, showing options: 'EndNote online', 'EndNote desktop', 'Add to my Publons profile', 'Plain text file', 'RIS', 'BibTeX', 'Excel', 'Tab delimited file', and 'Printable HTML file'. A blue arrow points from the article title to the 'Add to my Publons profile' option in the menu.

Option 2 –
Claim one or more author records
and get them merged into your
unique claimed profile

The screenshot shows an author record page for Patricia Rijo. The name 'Rijo, Patricia' is highlighted with a green box. Below the name, there is a note: 'This is an algorithmically generated author record'. The affiliation is 'Lusofona University, Res Ctr Biosci & Hlth Technol, LISBON, PORTUGAL'. On the right side, there is a section titled 'Are you this Author?' with a sub-header 'Verify your work, and control how your name, title, institution, and profile image appears in your Web of Science Author Record.' Below this section is a blue button labeled 'Claim my record'. A large blue arrow points downwards from the 'Claim my record' button.

The author is the only person who can claim his/her author record

*“Sign In” the Web of Science using the same email as for your Publons profile
(and avoid duplicating your profile)*

The screenshot shows a Publons author record for Patricia Rijo. The record is identified as algorithmically generated. A 'Claim my record' button is visible. A confirmation dialog box is overlaid on the bottom right, asking the user to proceed to claim the record or cancel.

The screenshot shows a detailed author profile for Jennifer Villwock on the Clarivate Web of Science platform. The profile includes a profile picture, name, and affiliation (University of Kansas - Medical Center). It lists various metrics such as H-index (7), Total Publications (22), Sum of Times Cited (184), and Citing Articles (170). The profile also displays a list of journals published in, a list of publications (22 total), and a list of peer reviews (31 total). The publications list includes titles like 'Beyond the USMLE: The STAR Algorithm for Initial Residency Applicant Screening and Interview Selection' with citation counts. The peer review list includes titles like 'Applied Intelligence' and 'Advances in Engineering Software'. The profile also features a 'Metrics' dashboard, an 'Author Impact Beampoint Summary' chart, and an 'Author Position' bar chart showing the distribution of author roles (First, Last, Corresponding).

Exporting a list of publications (for users)

The screenshot shows a search results page with two items. The first item is titled "Characterizing the Mechanisms of Essential Oils on Skin Homeostasis-Data from Sonographic Imaging, ...". The second item is titled "Dehydroabietic Acid Methyl Ester as Biofilm-Mediated Infections Treatment". An "Export" dropdown menu is open over the first item, listing options: EndNote online, EndNote desktop, Add to my Publons profile, Plain text file, RIS, BibTeX, Excel, Tab delimited file, Printable HTML file, and InCites. A "More Export Options" link is also visible. A green box highlights the "Add To Marked List" button, and a purple box highlights the "Export" dropdown menu.

The "Export Records to Excel" dialog box shows "Record Options" with "All records on page" selected. The "Records from:" field is set to 1 to 1000. A note states "No more than 1000 records at a time". Under "Record Content:", "Full Record" is selected in the dropdown menu. "Export" and "Cancel" buttons are at the bottom.

The "Export Records to Tab Delimited File" dialog box shows "Record Options" with "All records on page" selected. The "Records from:" field is set to 1 to 1000. A note states "No more than 500 records at a time". Under "Record Content:", "Full Record and Cited References" is selected in the dropdown menu. "Export" and "Cancel" buttons are at the bottom.

Accessing our data

Small

Size of user base

Large

The Raw Data can be loaded into databases, linked with other data sources, and used for the largest and most intricate analyses - utilising a complete set of the data partitioned on years and editions

APIs can be used by more savvy users to do more involved search and analysis, as well as to self serve full record data in smaller batches, and facilitate integration with other systems

Web of Science platform can be used by the lay user for basic search and analysis, as well as export of the smallest sets of data in the least structured format editions

- All three levels applicable at any organization, to get the most out of the dataset and maximize efficiency, access and insight.
- Different elevation levels provide flexibility relative to expertise and user cases.

Information about APIs (for librarians)

<https://clarivate.com/webofsciencegroup/solutions/xml-and-apis/>

Source: Web of Science

**Article Match Retrieval
(AMR)**
free

A publication matching API that enables real-time Web of Science bibliographic search to update citation counts in batch mode or real time, along with producing links back to Web of Science for further discovery and analyses.

Web of Science API Lite
free

A responsive API that supports rich searching across the Web of Science Core Collection to retrieve core article metadata.

This service provides a great way to reuse Web of Science data both internally and externally to enhance institutional repositories and research networking systems with best-in-class data.

**Web of Science API
Expanded**
subscription

A robust and comprehensive API that delivers deep detail into the most valuable publication and citation information found in the Web of Science Core Collection.

Includes everything in the Web of Science Lite API plus additional metadata, such as author, affiliations, identifiers and funding data.

About Web of Science™
The *Web of Science* is the information and technology provider for the global scientific research community. We provide data, analytics and insights, as well as workflow tools and bespoke professional services to researchers and the entire research community that underpins research – universities and research institutions, national and local governments, private and public research funding organizations, publishers and research-intensive corporations, across the world.

You are here: Web of Science Collections > [Web of Science Core Collection](#) > Open Access

Open Access

Open access status is provided across the Web of Science platform as a result of a partnership with [OurResearch](#), a not-for-profit organization that recently launched a knowledge base of Open Access (OA) content. This knowledge base makes it possible to discover and link to legal Gold or Bronze (free content at a publisher's website) and Green (e.g., author self-archived in a repository) OA versions. This partnership improves discoverability and access to article-level OA versions not only by adding more links to OA content, but also by prioritizing the links to the best version of OA content when multiple versions of an article are available. You can learn more about OA on the [Clarivate website](#).
