Disease Forecasts

A customizable report for serious disease forecasting with full source traceability

Building your strategy

To build an effective strategy, your asset requires an analysis of epidemiology. You need to understand where the market is going for you to confidently claim your share of the market.

Clarivate Analytics is taking the next step in Epidemiology. In addition to the Incidence and Prevalence Database (IPD), the globally recognized and first epidemiology database in our industry, we are adding *Disease Forecasts*.

Our *Disease Forecast*s can be purchased separately or paired with the IPD and the scientific data from the *Cortellis* Disease Briefings. Together they provide the most complete disease information package available for your business strategy.

Disease Forecast report

With our PhD and senior epidemiologists and an industry leading forecast analyst, we have created a unique, dynamic disease forecast report.

Including:

- 15 year forecast for G7 and BRIC countries

- Population, prevalence, segmentation, diagnosis and treatment data points

- Customizable Calculation for each data point with a proprietary algorithm

- Single source for each data point – no "black box guesstimates"

- Forecasts by individual country (USA, Canada, France, Germany, Italy, Japan, U.K.; Brazil, Russia, India, China) and by group (G7; BRIC; G7+BRIC)

Custom Prevalence, Diagnosis, and Treated Populations

Legend:
- Custom Prevalence Population
- Custom Diagnosed Population
- Custom Treated Population

Disease Forecasts offer a 15 year forecast on specific diseases for G7 and BRIC countries. Each report includes prevalence with subgroups, treated and diagnosed rate. All data is backed by and linked to our Incidence and Prevalence Database.

Together, with the IPD and *Cortellis* Disease Briefings our *Disease Forecasts* offer the most comprehensive epidemiology package available.

Who we are

Clarivate Analytics accelerates the pace of innovation by providing trusted insights and analytics to customers around the world, enabling them to discover, protect and commercialize new ideas faster. We own and operate a collection of leading subscription-based services focused on scientific and academic research, patent analytics and regulatory standards, pharmaceutical and biotech intelligence, trademark protection, domain brand protection and intellectual property management. *Clarivate Analytics* is now an independent company with over 4,000 employees, operating in more than 100 countries and owns well-known brands that include *Web of Science*, *Cortellis*, *Derwent*, *CompuMark*, *MarkMonitor* and *Techstreet*, among others.
