Comprehensive IP expertise, analytics and intelligence for the Asia Pacific region
Asia’s share of all patent applications filed worldwide has increased to over 60%, primarily driven by strong growth in filings in China where applications have increased 5-fold since 2008.

The dual use of utility models and patents in China makes it difficult for patent searchers to ensure they have full and accurate information. It is estimated that up to 20% of total filings are dual filings. Furthermore, accurately translating Chinese as well as Japanese and Korean patents continues to be a challenge in protecting and practicing inventions in the Asia Pacific region.

Commercial organizations based in Asia face similar challenges in protecting innovation in local markets and commercializing their inventions globally.

Get early visibility of Chinese dual filings

Dual utility model and patent filings are published on different dates and have no obvious link with each other. As a result, they often end up in different patent families with no indication that the utility model has an accompanying invention application and vice versa.

Using a combination of machine learning and human intellect, Chinese dual filings are now linked in DWPI families just days after publication. The use of human intellect is essential in removing ambiguities in assignment of potential dual filing matches.

Inform IP and business decisions with the world’s most trusted data, applications and services

Based on patent records from over 50 PTOs, Derwent World Patents Index (DWPI) provides a superhighway to globalization for companies expanding into or out of Asia Pacific. Patent records are converted into a standard format, errors corrected, and enriched with enhanced titles and abstracts in English.

Furthermore, Clarivate Analytics provides linked Chinese dual filings, enhanced full-text English translations, and local search and analytics services in China, Japan and in other key locations around the world.
Have confidence in Asia Pacific patent searches with industry-leading translations

DWPI gives you the most complete view of innovation activity across the globe with titles and abstracts in English translated from over 30 different languages. We have been translating patent applications for almost 20 years from China, Indonesia, Japan, Korea, Thailand and Vietnam using advanced machine-based systems.

Human-assisted translation is a vital component of the process in order to maintain a consistent, high standard of output. As a result, major patent offices across the Asia Pacific region use DWPI for their patent research, including SIPO, JPO, IPOS and IPOPhil.

We now provide complete full text translations for Chinese patent applications, utility models and granted patents. The additional information in the description helps ensure the retrieval of all relevant records in prior art or state of the art searches. Finally, address information for assignees/applicants has also been added to inform competitive intelligence and licensing workflows.

Enhanced patent titles and abstracts

DWPI titles and abstracts are written in English—using clear, consistent industry specific terms, allowing you to quickly identify which patents are important to your work.

Solution highlights

**Derwent World Patents Index (DWPI)**

Used by over 40 Patent Offices globally, *Derwent World Patents Index* provides the world’s most comprehensive database of enhanced patent data from 52 patent issuing authorities.

- Editorially created enhanced titles and abstracts all in English, covering the novelty of the invention
- Patent records are converted into a standard format, errors corrected, and each record assigned to a patent family and industry code

**Asia Pacific Patent Data**

Asia Pacific patent information in English provides faster, more accurate results. Coverage includes:

- Australia
- China
- Hong Kong
- India
- Indonesia
- Japan
- Korea
- Malaysia
- New Zealand
- Philippines
- Singapore
- Taiwan
- Thailand
- Vietnam

*Used by over 40 Patent Offices globally, Derwent World Patents Index provides the world’s most comprehensive database of enhanced patent data from 52 patent issuing authorities.*

**Derwent Innovation**

Derwent Innovation is unrivalled as an IP search and analytics platform enhanced with Chinese patent applications, utility models and granted patents.

**Search, Analytics and Translation Services**

Our global team of over 300 consultants are located in major IP hubs that include: USA, Europe, UK, Japan, China, Russia, Australia and New Zealand.

Within the APAC region, our client base includes international entities who are looking to operate locally, as well as local organisations with global aspirations. Our local knowledge is unsurpassed; with search and analytics capabilities in Japan complimented by an equally experienced team of Chinese-speaking patent search consultants in Beijing.

We supplement our leading content and tools — *DWPI, Derwent Innovation* and *Web of Science* — with leading local patent and academic databases.

**Services include:**

- Clearance/Right-to-Use/Freedom-to-Operate
- Collection/State-of-the-Art
- Competitive/Technical Intelligence
- Expert human patent translations
- Novelty/Patentability/Prior Art
- Patent Watches, Alerts and Profiles
- Validity/Invalidity
About Derwent

Derwent powers the innovation lifecycle from idea to commercialization — with trusted patent data, applications and services including Derwent Innovation, Derwent World Patents Index (DWPI), Derwent Patents Citation Index (DPCI), Derwent Data Analyzer and a range of expert IP services. We build solutions for inventors, patent attorneys and licensing specialists at start-ups and the largest global innovators, legal professionals at the leading intellectual property practices and patent examiners at more than 40 patent offices. Our solutions are used to monitor technology trends and competitive landscapes, inform FTO opinions, prosecute patents, monetize and license assets and support litigation activities.

About Clarivate Analytics

Clarivate Analytics is the global leader in providing trusted insights and analytics to accelerate the pace of innovation. Building on a heritage going back more than a century and a half, we have built some of the most trusted brands across the innovation lifecycle, including Web of Science, Cortellis, Derwent, CompuMark, MarkMonitor and Techstreet. Today, Clarivate Analytics is a new and independent company on a bold entrepreneurial mission to help our clients radically reduce the time from new ideas to life-changing innovations.
