Derwent Innovation

Find, analyze and simplify the most relevant patent information

Transforming data into commercial intelligence

The pace of technology change is unprecedented with new sectors emerging and others converging, while rapidly-growing emerging economies provide tremendous opportunities. At the same time, companies waste billions filing for patents that are not granted, and mistakes in freedom to operate (FTO) result in costly litigation and product changes.

Derwent Innovation provides trusted patent data and tools to monitor technology trends and competitive landscapes, inform FTO opinions, prosecute patents, monetize and license assets and support litigation activities.

Patent Litigation
Quickly find the insights you need when defending against infringement suits

Monetization and Licensing
Leverage citation analytics to identify new opportunities for existing IP

Patent Prosecution
Reduce costs and improve patent grant rates

Innovation Landscape
Inform R&D spend with a comprehensive view of the innovation landscape

Competitive Intelligence
Identify new entrants that present a threat

Freedom to Operate
Undertake FTO searches with confidence, in less time

Derwent

Powering IP Innovation
Connecting best-in-class technology, expertise and patent data

Derwent Innovation is unrivalled as the world’s leading patent research platform—powered by AI enhanced analytics and intuitive workflows designed by patent experts.

Our Global Patent Data collection provides a comprehensive set of full text documents and technical drawings from around the world. In addition, the Derwent World Patents Index (DWPI) and Derwent Patents Citation Index (DPCI) provide enhanced titles, abstracts and citation data.

Relevance-ranked search results with reduced query build times

Smart Search in Derwent Innovation, powered by DWPI content, accurately recreates the processes that underpin a professional patent search. It uses a proprietary AI-driven engine that allows you to include large text blocks and prior art in your search process.

Actionable intelligence powered by advanced analytics

Derwent Innovation’s integrated workflows incorporate many of the best practices used by patent experts today.

• Optimized Assignee and Ultimate Parent allow you to discover a patent’s true owner, even if ownership details have not been disclosed

• Themescape provides a visual representation of relationships between inventions and helps identify areas best suited for future innovation

• Text Clustering sorts records into related sets, helping you pinpoint relevant records

• The Use Field provides a quick way of identifying how a technology could be applied to other areas

• Advanced visualizations, powered by our next generation charts, help you to quickly identify key competitors, technologies and trends

• Citation Maps provide detailed visualizations of cited and citing patents, for example to identify licensing opportunities

Inform your analysis with predictive, transparent legal status and ownership

Understanding the legal status of patents at a global level requires looking across billions of data points. Our predictive legal status indicator accelerates this process by providing an up to date, accurate view of patent strength in a given domain.

Use Custom Fields to connect the dots and drive collaboration

You can add your own data (for example, classifications, ratings, product, and licensing information) to Derwent Innovation, and quickly discover the relationships between your data and the world’s—using ThemeScape Maps. In this way you can search, analyze, and share relevant findings with colleagues, enhancing collaboration and streamlining your workflow.

ThemeScape Maps: Transform complex data into common themes and view them in a topographical landscape.
Product highlights

**Patent Ownership Discovery Tools**
- Optimized Assignee
- Ultimate Parent

**Search Capabilities**
- Smart Search makes it easy to find patents based on DWPI titles and abstracts
- Boolean search window
- Expert search
- Publication number search

**Monitoring Capabilities**
- Watched Record feature to follow individual patents
- Set alerts by technology area

**Visualization & Analytical Tools**
- Results Dashboard
- ThemeScape Maps
- Text Clustering groups records into related sets
- Pre-defined and custom charts
- Citation Maps of cited and citing patents

**Customization and Export**
- Custom Fields
- Export to Excel

Content highlights

**Global Patent Data**
- Full text patent data collections from global patenting authorities
- Normalised and corrected data

**Derwent World Patents Index (DWPI)**
- Editorially created patent abstracts from 50 authorities all in English covering the novelty of the invention
- Enhances your ability to find critical patent information by returning relevant results otherwise missed

**Derwent Patents Citation Index (DPCI)**
- Contains structured forward and backward citations with DWPI assignee and inventor information
- Covers both author and examiner citations curated by our editorial team and collated at the invention level

**Predictive Data**
- Dead/Alive/Indeterminate Indicator
- Estimated Expiration Date
- Remaining Life
- Family View of legal status (INPADOC & DWPI)
- Ownership / Optimized assignee

**Non-patent Prior Art**
- Web of Science literature and Conference Proceedings databases
- Institution of Engineering and Technology’s Inspec bibliographic database

---

Our strategic partnership with Clarivate Analytics has expanded, refined and customised our IP management. This is one of the most important ways of informing proactive and confident decision making.

Intellectual Property Technical Advisor, Sasol
About Derwent

Derwent powers the innovation lifecycle from idea to commercialization—with trusted patent data, applications and services including Derwent Innovation, Derwent World Patents Index (DWPI), Derwent Patents Citation Index (DPCI), Derwent Data Analyzer and a range of expert IP services. We build solutions for inventors, patent attorneys and licensing specialists at start-ups and the largest global innovators, legal professionals at the leading intellectual property practices and patent examiners at more than 40 patent offices. Our solutions are used to monitor technology trends and competitive landscapes, inform FTO opinions, prosecute patents, monetize and license assets and support litigation activities.

About Clarivate

Clarivate Analytics is the global leader in providing trusted insights and analytics to accelerate the pace of innovation. Building on a heritage going back more than a century and a half, we have built some of the most trusted brands across the innovation lifecycle, including Web of Science, Cortellis, Derwent, CompuMark, MarkMonitor and Techstreet. Today, Clarivate Analytics is a new and independent company on a bold entrepreneurial mission to help our clients radically reduce the time from new ideas to life-changing innovations.
