Filing for Patents

India has four regional patent offices in Delhi, Kolkata (Head Office), Mumbai and Chennai. All patent activities can be carried on by all the patent offices.

Under the Patents Act, an invention means "A new product or process involving an inventive step and also capable of being made or used in the industry". For an invention to be patentable it should be technical in nature and should meet the following criteria: it should be novel, contain an inventive step, and be industrially applicable.

Applications may be made by the inventor(s) and/or their assignee, or a legal representative if the inventor/assignee is deceased.

Applications must be filed in English or Hindi, with an abstract of no more than 150 words.

An international application under the *Patent Cooperation Treaty* designating India requires the applicant to file with the Indian Patent Office within 31 months of the priority date. If an application is not filed in one of the official languages, a translation is required.

Applicants must request for a patent application to be examined. This must be done within 48 months of the filing date.

Where no request is made in the timeframe, the application will be treated as withdrawn and cannot be revived.

A pre-grant opposition must be filed within six months from the date of publication of the application or before the grant of the patent.
