Esploro™ Research Portal and Profiles allows institutions to showcase their research excellence with ease by automatically capturing publications and connecting information into one portrait of your institution. It reduces manual entry and breaks down data silos, linking comprehensive scholarly information from the most trusted sources across all academic disciplines.

Esploro’s profiles provide your institution with a comprehensive view of the research done by its researchers. While the portal ensures the research outputs are visible and discoverable, the dynamic profiles are updated regularly so researchers are showcasing the full breadth and depth of their current work and expertise.

Multi-dimensional Esploro profiles include a wide array of research outputs, including publications, projects, activities, datasets and more. Publications account for the majority of outputs, and capturing all relevant work is essential to showcasing outputs and the impact measures associated with them.

The Esploro Profile Enrichment Service manages the automated and manual processes required to connect publications from several sources to your authors, removing the burden from the institution.

Lift the manual burden and let Clarivate populate your institution’s profiles

Quickly obtain accurate and complete profile data
Delivering enriched profiles

Esploro connects researchers to their works using a multi-step approach which is executed during an implementation phase and continues with ongoing updates.

There are two methods for accomplishing the work, which can be used in tandem or separately:

A. Profile Enrichment Service
Clarivate builds and expands the institution’s profile data

B. Self-serve profile creation
Using Esploro administrator tools, institutions can gather data and populate profiles.

With the Profile Enrichment Service:

- **Reduce rollout time** and gain a rich portal and comprehensive profiles that demonstrate the Esploro value to researchers, department heads and other stakeholders.

- **Reduce the workload** associated with building a comprehensive, retrospective, collection of your researchers’ publications. Clarivate will run the automated tools, review results and assist with corrections for accuracy.

When opting for this service, an Esploro Professional Services expert will work with you to identify potential data sources and will get your feedback at several checkpoints during the project.

We recommend using the service when Esploro is first implemented. It can also be used anytime and contracted regularly to ensure that researchers new to the institution can benefit.
